Item 4(c) of the provisional agenda

ECE Committee on Forests and the Forest Industry matters**Draft programme of work of the Forestry and timber
subprogramme for 2014-2015****Note by the Secretariat****Introduction**

1. The present document sets out the draft programme of work of the Forestry and timber subprogramme (“the subprogramme”) for 2014–2015 as part of the Integrated Programme of Work 2014-2017 of the Economic Commission for Europe (ECE) Committee on Forests and the Forest Industry (COFFI) and the Food and Agriculture Organization of the United Nations (FAO) European Forestry Commission (EFC). The Committee on Forests and the Forest Industry (“the Committee”) is invited to consider the programme and subsequently adopt it at its 71st session. It will then be submitted to the ECE Executive Committee for formal approval. The Committee will have the opportunity to adjust its programme of work during the course of the biennium and such adjustments will be reflected in a separate document.

2. The draft programme of work applies a results-based approach. It comprises, for each cluster of activities an expected accomplishment and a list of outputs/activities proposed to be carried out in 2014–2015. The delivery of these outputs/activities is expected to contribute to achieving the expected results.

3. The grouping of activities into clusters is exactly the same as used by the Committee for the biennial evaluation of its subprogramme performance.

4. Furthermore, the outputs/activities listed in this document correspond with the ECE proposed programme budget for 2014–2015 and are complemented by additional items to reflect the more recent developments and needs of ECE member States. For easy reference, such new outputs/activities have been clearly indicated as “additional”.

5. The outputs/activities have been listed under the cluster of activities to which they belong according to the following main categories: (a) meetings and related parliamentary documentation; (b) publications and other information material; and (c) technical cooperation, including, seminars, workshops, training sessions, advisory services.

6. The relevant indicators of achievement, together with baseline and target data, against which performance will be measured, are presented in a separate document ECE/TIM/2013/9–FO:EFC/2013/9 in order to facilitate the task of the Committee to assess whether all outputs which are necessary to achieve the expected result have been included in the plan.

7. Finally, Annex I to the present document lists the ECE overall legislative mandates and those specific for the subprogramme.

I. Objective and strategy

8. The objective of the subprogramme is to strengthen the forest sector and its contribution to sustainable development throughout the ECE region.

9. The responsibility for the subprogramme is vested in the Trade and Sustainable Land Management Division. The subprogramme will aim to: develop and apply analytical and monitoring tools for use both on policy issues and on developments on the ground; collect, validate and disseminate information and analysis; and stimulate the exchange of experience, best practices and joint efforts to measure progress. In addition, the subprogramme will provide a platform for topical discussions, taking into account the changing policy environment, notably as regards climate change and bioenergy. It will promote the role of forests in mitigating and adapting to climate change.

10. The subprogramme will promote the sustainable management of forests and the sound and legal use of forest products, for raw material and energy as well as forest services, based on appropriate policies and institutions. Priorities for 2014-2015 will be guided by: (a) the outcomes of work of ECE Committee on Forests and Forest Industry and the FAO European Forestry Commission; (b) relevant outcomes of the Sixth Ministerial Conference on the Protection of Forests in Europe, which took place in June 2011; (c) continued efforts to address climate change and the transition to a green economy; and (d) the results of the strategic review conducted in 2012-2013.

11. While all ECE countries benefit from international cooperation through the subprogramme, special attention will be paid to the countries of Eastern Europe, the Caucasus, Central Asia and the Mediterranean region to implement sustainable forest management through capacity-building activities, and by promoting their involvement in international activities in the region.

12. As part of the strategy to implement the subprogramme, ECE will carry out its work in cooperation with FAO and the Ministerial Conference on the Protection of Forests in Europe (Forest Europe), and provide regional input to the United Nations Forum on Forests and, through it support to the EFC, to the FAO Committee on Forestry.

13. To support forest management, including the use of wood and forest products that is ecologically, economically and socially sustainable, it is necessary: (a) to maintain a good balance among these factors, based on a strong consensus among all stakeholders about goals and methods; and (b) to ensure that the strategy is well integrated into the policy framework of other sectors through a cross-sectoral approach. Achieving sustainable forest management is primarily a sovereign national responsibility. However, regional international cooperation and interregional cooperation, through the forestry and timber subprogramme and its partners, will contribute by developing and disseminating concepts

and information, through the communication, sharing of experiences and definition of standard measurement tools (criteria and indicators) for sustainable forest management. At the same time, the changing needs of society and the impact of global developments will be guiding factors at the regional level.

II. Outputs/activities to be delivered in the 2014–2015 biennium
