GLOBAL SOIL PARTNERSHIP

GLOBAL SOIL DOCTORS PROGRAMME
PROMOTERS' TERMS OF REFERENCE (ToRs)

The Global Soil Doctor Programme (GSDP) is a farmer-to-farmer training initiative that was developed by the Global Soil Partnership (GSP). The Programme aims to provide farmers with educational materials to learn about Sustainable Soil Management (SSM). The "champion" farmers – recognized as "Soil Doctors" – are selected to support and educate other farmers from their local community. This scheme creates a self-sufficient exchange process that promotes the practice of SSM.

The success of the Programme depends to a large extent on the existence of a promoter, a national institution or organization that facilitates the Programme and interacts with the GSP and all stakeholders. The promoter provides technical and financial support and ensures the sustainability of the Programme at the national or local level. The promoters are national figures from government agencies, extension services, academia, and non-governmental agencies (NGOs) that know and understand the local production and socio-economic conditions, challenges, and potential.

1 Global Soil Partnership and the Promoter agree on the implementation plan

2 Global Soil Partnership trains the promoter

3 Promoter identifies farmer groups and selects potential Soil Doctors

4 Training of the Soil Doctor by the promoter

5 Training of the Farmers by the Soil Doctor

Promoters' registration form

The first step for the implementation of the Global Soil Doctors Programme (GSDP) at the local level is the identification of a potential Promoter. To determine your institution suitability in implementing the Global Soil Doctors programme, please read the terms of reference (included below). If you are interested in supporting the implementation of the programme in your country, please fill-in the present form. You will receive a CONFIRM of the registration by e-mail.

Modules

Topic	Specific soil topic (e.g general soil properties, nutrients, salinity)
Posters	4 posters to be chosen among those available
Field exercises	3- 4 field exercises related to the topic including physical, chemical, biological observations
Evaluation	Final evaluation of soil condition and recommendations

Example: Module 1

Topic	What is soil?					
Posters	 <p>What is soil?</p>	 <p>How to best manage your soil</p>	 <p>How to enhance soil organic matter content?</p>	 <p>What is soil pH?</p>		
Field exercises	 <p>Aggregate stability</p>	 <p>Soil pH</p>	 <p>Roots</p>			 

Implementation activities in the PACIFIC

Tonga

- First preliminary meeting with Dr Siosua Moala Halava
- Way forward:

➔ Find suitable promoter/s (extension service)

➔ Find the proper location where to implement a pilot in harmonization with existing projects

➔ Module, poster translation to local language, budget, size ...

Implementation activities in other regions

Mexico

Promoting institution	Programa Universitario de Estudios Interdisciplinarios del Suelo (PUEIS)
Period	November - Ongoing
Module	What is soil?
N of trainers	32
N of participants at general meeting	TBD
N of Soil Doctors selected	TBD

Bangladesh

Promoting institutions	Ministry of Agriculture; Bangladesh Agricultural Research Council (BARC); Soil Resource Development Institute (SRDI)
Period	July- Ongoing
Module	Soil 4 nutrition
N of trainers	10
N of participants at general meeting	450
N of Soil Doctors selected	15

Positioning the Soil Doctors Programme as a mechanism that matters

As the Soil Doctors Programme enters its second year, it has successfully scaled-up farmer-to-farmer training initiatives in Bangladesh, Malawi and Mexico. The Programme will continue to strike up robust partnerships for the benefit of smallholders, empowering them to scale-up cost-effective, sustainable soil management (SSM) practices.

27/01/2022 Empowering farmers to safeguard sustainable soils

The Global Soil Doctor Programme is a farmer-to-farmer training initiative. The Global Soil Doctor Programme is a farmer-to-farmer training initiative. The Global Soil Doctor Programme is a farmer-to-farmer training initiative. The Global Soil Doctor Programme is a farmer-to-farmer training initiative.

These pilot schemes have illustrated the importance of establishing the national promoter and the “champion” farmer – also known as other farmers in the local community.

Promoters are an essential component of the Programme in each country so that they can offer solutions from knowledge, experience and resources to extend them to their local communities. Promoters are often national extension services, soil science societies, agricultural organizations (NGOs) or farmers’ associations.

Thailand’s testing kits empower farmers to monitor the state of their soils

Getting the balance right: regulating soil pH values to improve agricultural production

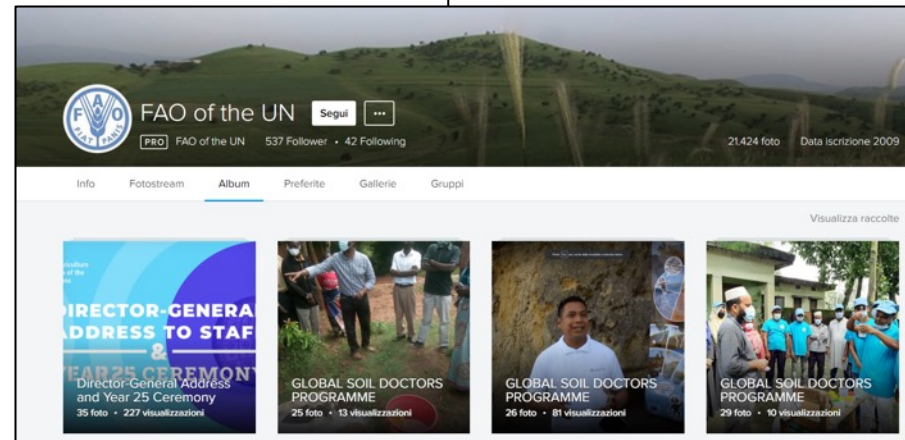

23/02/2022 The Global Soil Partnership’s (GSP) Soil Doctors Programme is upgrading the soil testing kits that are part of the Programme’s educational materials thanks to a donation from the government of Thailand.

Earlier this month, Thailand donated 1,000 soil pH testing kits to the GSP to be distributed to farmers who are participating in the Programme, which currently spans Bangladesh, Bolivia, Burkina Faso, Colombia, the Gambia, and Mexico.

Other countries will be selected to engage over the course of 2022 so that the Programme can enhance its’ capacities and extend the reach of sustainable soil management (SSM) to different regions around the world.

The Soil Doctors Programme started in Thailand in 1995 and is now being extended globally through the GSP. The Thai government has supported a number of the GSP’s initiatives over the past ten years and is committed to soil health and SSM.

He was a passionate and recognised soil scientist, and the member – is held in his name.
