Food and Agriculture Organization of the United Nations

**GLOBAL FOREST RESOURCES
ASSESSMENT**

COUNTRY REPORTS

BANGLADESH

FRA2005/141
Rome, 2005

The Forest Resources Assessment Programme

Sustainably managed forests have multiple environmental and socio-economic functions important at the global, national and local scales, and play a vital part in sustainable development. Reliable and up-to-date information on the state of forest resources - not only on area and area change, but also on such variables as growing stock, wood and non-wood products, carbon, protected areas, use of forests for recreation and other services, biological diversity and forests' contribution to national economies - is crucial to support decision-making for policies and programmes in forestry and sustainable development at all levels.

FAO, at the request of its member countries, regularly monitors the world's forests and their management and uses through the Forest Resources Assessment Programme. This country report forms part of the Global Forest Resources Assessment 2005 (FRA 2005), which is the most comprehensive assessment to date. More than 800 people have been involved, including 172 national correspondents and their colleagues, an Advisory Group, international experts, FAO staff, consultants and volunteers. Information has been collated from 229 countries and territories for three points in time: 1990, 2000 and 2005.

The reporting framework for FRA 2005 is based on the thematic elements of sustainable forest management acknowledged in intergovernmental forest-related fora and includes more than 40 variables related to the extent, condition, uses and values of forest resources. More information on the FRA 2005 process and the results - including all the country reports - is available on the FRA 2005 Web site (www.fao.org/forestry/fra2005).

The Global Forest Resources Assessment process is coordinated by the Forestry Department at FAO headquarters in Rome. The contact person for matters related to FRA 2005 is:

Mette Løyche Wilkie
Senior Forestry Officer
FAO Forestry Department
Viale delle Terme di Caracalla
Rome 00100, Italy

E-mail: Mette.LoycheWilkie@fao.org

Readers can also use the following e-mail address: fra@fao.org

DISCLAIMER

The designations employed and the presentation of material in this information product do not imply the expression of any opinion whatsoever on the part of the Food and Agriculture Organization of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

The Global Forest Resources Assessment 2005 Country Report Series is designed to document and make available the information forming the basis for the FRA 2005 reports. The Country Reports have been compiled by officially nominated country correspondents in collaboration with FAO staff. Prior to finalisation, these reports were subject to validation by forestry authorities in the respective countries.

Report preparation and contact person

This report has been prepared by:

Name: Mr. Quazi Liaquat Ali (National Correspondent to FRA)

Title: Senior Assistant Secretary

Organization: Ministry of Environment and Forests

Address: Bangladesh Secretariat, Dhaka

Tel:

Fax:

Email: admin5@moef.gov.bd

Other professionals involved in the reporting process:

Mr Younus Ali, ACCF, FD

ccfbd@mail.accesstel.net

Mr M A Latif, CRO (cc), BFRI

alatif@abnetbd.com

Mr Sukumar, SRO, BFRI

alatif@abnetbd.com

Mrs Rayhana Siddique, DCF, FD

1 Table T1 – Extent of Forest and Other wooded land

1.1 FRA 2005 Categories and definitions

| Category | Definition |
|---|--|
| Forest | Land spanning more than 0.5 hectares with trees higher than 5 meters and a canopy cover of more than 10 percent, or trees able to reach these thresholds <i>in situ</i> . It does not include land that is predominantly under agricultural or urban land use. |
| Other wooded land | Land not classified as “Forest”, spanning more than 0.5 hectares; with trees higher than 5 meters and a canopy cover of 5-10 percent, or trees able to reach these thresholds <i>in situ</i> ; or with a combined cover of shrubs, bushes and trees above 10 percent. It does not include land that is predominantly under agricultural or urban land use. |
| Other land | All land that is not classified as “Forest” or “Other wooded land”. |
| Other land with tree cover (Subordinated to “Other land”) | Land classified as “Other land”, spanning more than 0.5 hectares with a canopy cover of more than 10 percent of trees able to reach a height of 5 meters at maturity. |
| Inland water bodies | Inland water bodies generally include major rivers, lakes and water reservoirs. |

1.2.1 Classification and definitions

There has been no nation wide inventory or survey of forests in Bangladesh. The Forest Department of Bangladesh mostly follows the FAO categories and definitions. There are some local terms or terminology, which have been defined or described below.

| National class | Definition |
|-------------------------|---|
| Hill Forest | Forests developed over tertiary hills along the northeast and southeast fringe of the country. |
| Natural Mangrove | Forests – naturally developed in the active delta of river Padma along the coast of Bay of Bengal. |
| Mangrove Plantation | Artificially created plantation of mangrove species over the estuary of the river Meghna |
| Plain Land Sal Forest | Forest, naturally developed in the Pleistocene terrace, spread over the central and northern region of the country. |
| Unclassed State Forests | It is also hill forests but not classed as forest. |
| Forest Under Rubber | Rubber plantation managed for latex production. |
| Village Forest | Homestead garden – intensively managed – where fruits are preferential species. |
| Open Sal Forest | These are original Sal forest, which have been but depleted over time and their density is poor. |
| Khas Forest Lands | The forest in the govt. khas land, but not managed. |
| Strip Plantation | The afforestation along the roads, railway line, 'Bangladesh Water Development Board' embankment and linear strips. |
| Haor | A haor is a low-lying area consisted of bowl shaped depressions or succession of depressions. |
| Baor | A baor is a oxbow lake formed in a dead arm of a river. |

1.2.3 Original data

A. Hill Forests

1. Kassalong

| Category | Area in 000 ha | | |
|-----------------|----------------|---------------|---------------|
| | 1963 | 1983 | 1992 |
| Natural Forests | 76.195 | 61.273 | 53.225 |
| Bamboo | 41.366 | 12.653 | 12.653 |
| Sub Total | 117.561 | 73.926 | 65.878 |
| Scattered trees | | | 3.525 |
| Plantation | | | 19.186 |
| Total | 117.561 | 73.926 | 88.589 |

2. Rankhiang

| Variable | Area in 000 ha | | |
|-----------------|----------------|--------------|--------------|
| | 1963 | 1983 | 1992 |
| Natural Forests | 27.258 | 10.344 | 5.052 |
| Bamboo | 27.907 | 13.606 | 13.606 |
| Sub Total | 55.165 | 23.95 | 18.658 |
| Scatter trees | | | 6.494 |
| Plantation | | | 18.718 |
| Total | 55.165 | 23.95 | 43.87 |

3. Sitapahar

| Category | Area in 000 ha | |
|------------------------|----------------|-------------|
| | 1984 | 1990 |
| Natural Forests | 0.65 | 0.65 |
| Plantation (teak) | 3.81 | 3.74 |
| Sub total | 4.46 | 4.39 |
| Non-productive forests | 0.35 | 0.30 |
| Other | 0.62 | 0.75 |
| Sub-Total | 0.98 | 1.05 |
| TOTAL | 5.44 | 5.44 |

4. Sangu Matamuhari

| Category | Area in 000 ha | |
|------------------|----------------|--------------|
| | 1958 | 1983 |
| Timber mixed | 9.48 | 8.70 |
| Bamboo – Timber | 64.24 | 47.84 |
| Sub Total | 73.72 | 56.54 |
| Jhum | 0.03 | 17.10 |
| Other | 0.75 | 0.86 |
| Sub Total | 0.78 | 17.96 |
| Total | 74.50 | 74.50 |

5. Chittagong

| Category | Area in 000 ha | |
|-------------------|----------------|---------------|
| | 1984 | 1996 |
| Natural Forests | 30.003 | 22.224 |
| Bamboo | | 3.299 |
| Sub Total Forests | 30.003 | 25.523 |
| Scatter trees OWL | 22.468 | 34.157 |
| Plantation | 13.223 | 14.109 |
| Total | 65.694 | 73.789 |

6. Cox's Bazar

| Category | Area in 000 ha | |
|-------------------|----------------|---------------|
| | 1984 | 1996 |
| Natural Forests | 31.294 | 26.867 |
| Bamboo | | |
| Sub Total Forests | 31.294 | 26.867 |
| Scatter trees OWL | 3.205 | 3.532 |
| Plantation | 18.044 | 19.439 |
| Total | 52.543 | 49.838 |

7. Sylhet

| Category | Area in 000 ha | |
|-------------------|----------------|---------------|
| | 1984 | 1996 |
| Natural Forests | 3.337 | 2.782 |
| Bamboo | 13.933 | 20.04 |
| Sub Total Forests | 17.270 | 22.822 |
| Scatter trees OWL | 2.832 | 0.872 |
| Plantation | 11.502 | 17.872 |
| Total | 31.604 | 41.566 |

8. Jhum Plantations

The FMP, 1993 has indicated following area of Jhum Control plantations in the hills.

| Forest Plantation | Area in 000 ha (1990) |
|-------------------|-----------------------|
| Jhum Plantations | 15.36 |

B. Plain Sal Forests

1. Dhaka

| Category | Area in 000 ha | |
|-----------------------|----------------|--------------|
| | 1990 | 2000 |
| Natural Forests | 6.734 | 9.88 |
| Plantation (wood lot) | 0.917 | 2.04 |
| Total | 7.651 | 11.92 |

2. Tangail

| Category | Area in 000 ha | |
|-----------------------|----------------|-------|
| | 1990 | 2000 |
| Natural Forests | 9.975 | 8.130 |
| Plantation (wood lot) | 5.157 | 7.250 |
| Total | 15.132 | 15.38 |

3. Mymensingh

| Category | Area in 000 ha | |
|-----------------------|----------------|-------|
| | 1990 | 2000 |
| Natural Forests | 5.787 | 2.320 |
| Plantation (wood lot) | 3.844 | 5.136 |
| Total | 9.631 | 7.456 |

4. Dinajpur

| Category | Area in 000 ha | |
|-----------------------|----------------|-------|
| | 1990 | 2000 |
| Natural Forests | 0.946 | 1.472 |
| Plantation (wood lot) | 3.450 | 1.856 |
| Total | 4.396 | 3.328 |

5. Rangpur

| Category | Area in 000 ha | |
|-----------------------|----------------|-------|
| | 1990 | 2000 |
| Natural Forests | 0.084 | 0.064 |
| Plantation (wood lot) | 1.746 | 0.568 |
| Total | 1.83 | 0.632 |

6. Rajshahi

| Category | Area in 000 ha | |
|-----------------------|----------------|-------|
| | 1990 | 2000 |
| Natural Forests | not available | 0.128 |
| Plantation (wood lot) | not available | 0.200 |
| Total | not available | 0.328 |

C. Littoral Forests (Mangrove and Coastal Afforestation)

1. Sunderbans

| Category | Area in 000 ha | |
|-------------|----------------|---------|
| | 1981 | 1995 |
| Forests | 405.257 | 399.465 |
| Plantations | 0.351 | 0.217 |
| Total | 405.608 | 399.682 |

2. Coastal Afforestation

| Coastal Areas | Area in 000 ha | |
|---------------|----------------|--------|
| | 1984 | 1996 |
| Bhola CA | 3.565 | 12.42 |
| Chittagong CA | 3.342 | 20.042 |
| Noakhali CA | 6.065 | 34.223 |
| PatuaKhali CA | 4.007 | 9.848 |
| Total | 16.979 | 76.533 |

D. Rubber Plantation

| Category | Area in 000 ha | |
|--------------------|----------------|--------|
| | 1990 | 2000 |
| Rubber Plantations | 19.800 | 35.430 |

E. Unclassed State Forests

There is more than 700,000 ha of hill land under district administration and most of this land is barren and lacks forest cover (GOB, 1993 Page 84 Main volume). No information is available on extent of forest cover on this land except for following plantations in the hills (FMP, 1993). Hence its area, excluding following plantations, will be classified as “Other Land” under FRA 2005 Category.

| Forest Plantation | Area in 000 ha (1990) |
|--------------------|-----------------------|
| Khagrachari | 1.41 |
| Bandarban Pulpwood | 8.72 |
| Bandarban | 9.36 |
| Kaptai Pulpwood | 18.17 |

F. Strip Plantations

Bangladesh Forest Department (GOB, 2002) estimates that the country has about 72,498.37 km long strip plantations. If average width of these plantations is assumed to be 10 meters then 1 km long plantation is equal to 1 hectare and the total strip plantation in Bangladesh in 2002 may be treated as covering about 72, 498 ha. It will be classified as “Other Land with tree cover ” under FRA 2005 Category.

G. Village Homestead Forests

The “Forest Master Plan” indicates that about 270,000 ha are under village homestead forests comprising of bamboo as well as trees (GOB, 1993. “Statistical Report” – Village Forest Inventory- Page 1, one of the supplementary volumes to the “Forest Master Plan”). It will be classified as “Other Land with tree cover ” under FRA 2005 Category.

H. National Statistics on Total Area and Inland water bodies area

| Category | Country Variables | Area ('000 hectare) |
|--------------------------|--------------------|---------------------|
| Inland Water | | 1770.0 |
| | Haor, Baor & Lakes | 133.8 |
| | Rivers | 1506.2 |
| | Ponds | 130.0 |
| Total for country | Country Area | 14,757.0 |

Source: SYB 2000, Table- 2.02 page-20.

I. UN Statistics on Total Land Area and Inland Water bodies

The total area of the country in FAOSTAT is 14,400 (000 ha) and the area of inland water is 1383 (000 ha), which is different than the above.

1.3 Analysis and processing of national data

1.3.1 Calibration

The calibration has been done to match the area of the country and inland water bodies with FAOSTAT/UNSTAT by adjusting these area differences in the area of the “other land”.

1.3.2 Estimation and forecasting

The estimating and the forecasting for 1990, 2000 and 2005 have been done separately for each sub-national forest boundary of inventory or assessment as these has been inventoried or surveyed in different years as indicated in the original data.

A. Hill Forests

1. Kassalong

The linear trend has been used for natural forests and bamboo area. Since only one point information was available for Bamboo, Scattered trees and Plantations same figure has been used for 1990, 2000 and 2005.

| Category | Area in 000 ha | | |
|-----------------|----------------|--------------|--------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 55.01 | 46.07 | 41.60 |
| Bamboo | 12.65 | 12.65 | 12.65 |
| Sub Total | 67.67 | 58.72 | 54.25 |
| Scattered trees | 3.53 | 3.53 | 3.53 |
| Plantation | 19.19 | 19.19 | 19.19 |
| Total | 90.38 | 81.44 | 76.96 |

2. Rankhiang

The linear trend has been used for natural forests and bamboo area. Since only one point information was available for Bamboo, Scattered trees and Plantations same figure has been used for 1990, 2000 and 2005

| | Area in 000 ha | | |
|------------------|----------------|--------------|--------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 6.23 | 0.35 | 0.35 |
| Bamboo | 13.61 | 13.61 | 13.61 |
| Sub Total | 19.83 | 13.95 | 13.95 |
| Scatter trees | 6.49 | 6.49 | 6.49 |
| Plantation | 18.72 | 18.72 | 18.72 |
| Total | 45.05 | 39.17 | 39.17 |

3. Sita Pahar

The linear interpolation and extrapolation method has been used for estimating area of natural forests, plantations and non-productive forests in 1990, 2000 and 2005.

| Category | Area in 000 ha | | |
|------------------------|----------------|-------------|-------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 0.65 | 0.65 | 0.65 |
| Plantation (teak) | 3.74 | 3.62 | 3.56 |
| Sub total | 4.39 | 4.27 | 4.21 |
| Non-productive forests | 0.30 | 0.21 | 0.17 |
| Other | 0.75 | 0.96 | 1.06 |
| Sub-Total | 1.05 | 1.17 | 1.23 |
| TOTAL | 5.44 | 5.44 | 5.44 |

4. Sanghu Matamuhari

The linear interpolation and extrapolation method has been used for estimating areas of timber and bamboo-timber natural forests. The area of Jhum has been assumed constant since 1990.

| Category | 1990 | 2000 | 2005 |
|------------------|--------------|--------------|--------------|
| Timber mixed | 8.48 | 8.17 | 8.01 |
| Bamboo – Timber | 43.25 | 36.69 | 33.41 |
| Sub Total | 51.73 | 44.86 | 41.42 |
| Jhum | 17.10 | 17.10 | 17.10 |
| Other | 5.67 | 12.54 | 15.98 |
| Sub Total | 22.77 | 29.64 | 33.08 |
| Total | 74.50 | 74.50 | 74.50 |

3. Chittagong

The interpolation and extrapolation method has been used for estimating and forecasting the area of natural forests. Since bamboo had only data hence same figure has been assumed for the three reference years. Area under plantation for 1990 has been interpolated, while for 2000 and 2005 it has been assumed same as in 1996. The area under scattered trees for 1990 has been interpolated for 1990 but for 2000 and 2005 it has been treated as remainder area such that the total does not increase the actual original level of 1996.

| Category | Area in 000 ha | | |
|-------------------|----------------|---------------|---------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 26.114 | 19.631 | 16.390 |
| Bamboo | 3.299 | 3.299 | 3.299 |
| Sub Total Forests | 29.413 | 22.930 | 19.689 |
| Scatter trees | 28.313 | 36.750 | 39.991 |
| Plantation | 13.666 | 14.109 | 14.109 |
| Total | 71.391 | 73.789 | 73.789 |

4. Cox's Bazar

The interpolation and extrapolation method has been used for natural forests. Area under plantation for 1990 has been interpolated, while for 2000 and 2005 it has been assumed as in 1996. The area under Scattered trees for 1990 has been interpolated for 1990 but for 2000 and 2005 it has been treated as remainder area such that the total does not increase the actual original level of 1996.

| Category | Area in 000 ha | | |
|-------------------|----------------|---------------|---------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 29.081 | 25.391 | 23.547 |
| Bamboo | 0 | 0 | 0 |
| Sub Total Forests | 29.081 | 25.391 | 23.547 |
| Scatter trees OWL | 3.369 | 5.008 | 6.852 |
| Plantation | 18.742 | 19.439 | 19.439 |
| Total | 51.191 | 49.838 | 49.838 |

5. Sylhet

The interpolation and extrapolation method has been used for estimating and forecasting the areas of natural forests. Area under bamboo has been interpolated for 1990 but for 2000 and 2005 it has been assumed same as in 1996. The area under plantation for 1990 has been interpolated, while for 2000 and 2005 it has been assumed as in 1996. The area under Scattered trees for 1990 has been interpolated for 1990 but for 2000 and 2005 it has been treated as remainder area such that the total maintains the original level of 1996.

| Category | Area in 000 ha | | |
|-------------------|----------------|---------------|---------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 3.060 | 2.597 | 2.366 |
| Bamboo | 16.987 | 20.04 | 20.04 |
| Sub Total Forests | 20.046 | 22.637 | 22.406 |
| Scatter trees OWL | 1.852 | 1.057 | 1.288 |
| Plantation | 14.687 | 17.872 | 17.872 |
| Total | 36.585 | 41.566 | 41.566 |

6. Other Plantations

The area in 1990 has been assumed for 2000 and 2005 since there was only one point in time information available for the following plantations in the hills.

| Category | Area in 000 ha | | |
|--------------------|----------------|--------------|--------------|
| | 1990 | 2000 | 2005 |
| Khagrachari | 1.41 | 1.41 | 1.41 |
| Bandarban Pulpwood | 8.72 | 8.72 | 8.72 |
| Bandarban | 9.36 | 9.36 | 9.36 |
| Kaptai Pulpwood | 18.17 | 18.17 | 18.17 |
| Jhum control | 15.36 | 15.36 | 15.36 |
| Total | 53.02 | 53.02 | 53.02 |

Total Hill Forests

The above estimating and forecasting for different forest areas has lead to the following total of forest, bamboo, plantation and scattered trees (OWL) areas in the hills of Bangladesh.

| Category | Area in 000 ha | | |
|---|----------------|---------------|---------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 128.63 | 102.86 | 92.91 |
| Bamboo | 89.79 | 86.29 | 83.01 |
| Sub-total Forests | 218.42 | 189.15 | 175.92 |
| Plantation | 141.76 | 145.97 | 145.91 |
| Sub-Total Forests and Plantation | 360.18 | 335.12 | 321.83 |
| Scattered trees (Other wooded lands)_ | 43.55 | 52.83 | 58.15 |
| Grand Total | 403.73 | 387.95 | 379.98 |

B. Plain Sal Forests

The figures for 1990 and 2000 were available. The figures of 2000 have been assumed for 2005 as they present more realistic picture of the forest resources on the ground.

1. Dhaka

| Category | Area in 000 ha | | |
|-----------------------|----------------|--------------|--------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 6.734 | 9.88 | 9.88 |
| Plantation (wood lot) | 0.917 | 2.04 | 2.04 |
| Total | 7.651 | 11.92 | 11.92 |

2. Tangail

| Category | Area in 000 ha | | |
|-----------------------|----------------|--------------|--------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 9.975 | 8.130 | 8.130 |
| Plantation (wood lot) | 5.157 | 7.250 | 7.250 |
| Total | 15.132 | 15.38 | 15.38 |

3. Mymensingh

| Category | Area in 000 ha | | |
|-----------------------|----------------|--------------|--------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 5.787 | 2.320 | 2.320 |
| Plantation (wood lot) | 3.844 | 5.136 | 5.136 |
| Total | 9.631 | 7.456 | 7.456 |

4. Dinajpur

| Category | Area in 000 ha | | |
|-----------------------|----------------|--------------|--------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 0.946 | 1.472 | 1.472 |
| Plantation (wood lot) | 3.450 | 1.856 | 1.856 |
| Total | 4.396 | 3.328 | 3.328 |

5. Rangpur

| Category | Area in 000 ha | | |
|-----------------------|----------------|--------------|--------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 0.084 | 0.064 | 0.064 |
| Plantation (wood lot) | 1.746 | 0.568 | 0.568 |
| Total | 1.83 | 0.632 | 0.632 |

6. Rajshahi

| Category | Area in 000 ha | | |
|-----------------------|----------------|--------------|--------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 0.128 | 0.128 | 0.128 |
| Plantation (wood lot) | 0.200 | 0.200 | 0.200 |
| Total | 0.328 | 0.328 | 0.328 |

Total Plains Forest

The above figures lead to the following total of the forest resources in the plains of Bangladesh.

| Category | Area in 000 ha | | |
|-----------------------|----------------|---------------|---------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 23.654 | 21.994 | 21.994 |
| Plantation (wood lot) | 15.314 | 17.050 | 17.050 |
| Total | 38.968 | 39.044 | 39.044 |

C. Littoral Forests (Mangroves and Coastal Afforestation)

Interpolation and extrapolation has been used to estimate the areas figures for 1990, 2000 and 2005 in littoral forest of Bangladesh.

1. Sunderbans

| Category | Area in 000 ha | | |
|-----------------|----------------|---------------|---------------|
| | 1990 | 2000 | 2005 |
| Natural Forests | 401.53 | 397.40 | 395.33 |
| Plantation | 0.26 | 0.22 | 0.22 |
| Total | 401.80 | 397.61 | 395.54 |

2. Coastal Afforestation

Interpolation and extrapolation has been used to estimate data for 1990, 2000 and 2005.

| Coastal Areas | Area in 000 ha | | |
|---------------|----------------|--------------|--------------|
| | 1990 | 2000 | 2005 |
| Bhola CA | 10.21 | 12.42 | 12.90 |
| Chittagong CA | 15.87 | 20.04 | 20.82 |
| Noakhali CA | 27.18 | 34.22 | 35.55 |
| PatuaKhali CA | 8.39 | 9.85 | 10.23 |
| Total | 61.65 | 76.53 | 79.50 |

Total Littoral Forests

| Category | Area in 000 ha | | |
|--------------|----------------|---------------|---------------|
| | 1990 | 2000 | 2005 |
| Forests | 401.53 | 397.40 | 395.33 |
| Plantations | 61.91 | 76.75 | 79.72 |
| Total | 463.44 | 474.15 | 475.05 |

D. Rubber Plantations

The figure for 2005 has been assumed same as of 2000.

| Category | Area in 000 ha | | |
|-------------------|----------------|--------|--------|
| | 1990 | 2000 | 2005 |
| Rubber Plantation | 19.800 | 35.430 | 35.430 |

E. Unclassed State Forests

There is more than 700,000 ha of hill land under district administration and most of this land is barren and lacks forest cover (GOB, 1993 Page 84 Main volume). Detail information is not available on extent of forest cover on this land. Since only point (1992) information is available for village homestead forests the same information is being assumed for 1990, 2000 and 2005.

| Category | Area in 000 ha | | |
|--------------------------|----------------|------|------|
| | 1990 | 2000 | 2005 |
| Un-classed State forests | 700 | 700 | 700 |

F. Strip Plantations

Bangladesh Forest Department (GOB, 2002) estimates that the country has about 72,498.37 km long strip plantations. If average width of these plantations is assumed to be 10 meters then 1 km long plantation is equal to 1 hectare and the total strip plantation in Bangladesh in 2002 may be treated as covering about 72, 498 ha.

| Category | Area in 000 ha | | |
|-------------------|----------------|------|------|
| | 1990 | 2000 | 2005 |
| Strip plantations | 73 | 73 | 73 |

G. Village Homestead Forests

Since only point (1992) information is available for village homestead forests the same information is being assumed for 1990, 2000 and 2005. This assumption is also based on the cultural practice to maintain and conserve village homesteads.

| Category | Area in 000 ha | | |
|---------------------------|----------------|------|------|
| | 1990 | 2000 | 2005 |
| Village homestead forests | 270 | 270 | 270 |

H. Total Hills, Plain and Littoral Forests and Rubber Plantation

| National Category | | Area in 000 ha | | |
|--|-----------|----------------|---------------|---------------|
| | | 1990 | 2000 | 2005 |
| Natural Forests | Hills | 218.42 | 189.14 | 175.92 |
| | Plain | 23.65 | 21.99 | 21.99 |
| | Littoral | 401.53 | 397.40 | 395.33 |
| | Sub Total | 643.61 | 608.53 | 593.24 |
| Plantations | Hills | 141.76 | 145.97 | 145.91 |
| | Plain | 15.31 | 17.05 | 17.05 |
| | Littoral | 61.91 | 76.75 | 79.72 |
| | Rubber | 19.80 | 35.43 | 35.43 |
| | Sub Total | 238.79 | 275.20 | 278.11 |
| Sub Total Forest | | 882.39 | 883.74 | 871.35 |
| Scattered Trees (OWL) | | 43.55 | 52.83 | 58.15 |
| Homestead Forest and Strip Plantations | | 342.50 | 342.71 | 342.67 |

1.4 Reclassification into FRA 2005 classes

| Country Variables | FRA 2005 Categories | | | | |
|-----------------------------------|---------------------|-------------------|------------|-------------------------------------|---------------------|
| | Forest | Other Wooded land | Other land | Other land of which with tree cover | Inland Water bodies |
| Natural Forests | 100 | | | | |
| Forest Plantation | 100 | | | | |
| Scattered Trees | | 100 | | | |
| Rubber Plantations | 100 | | | | |
| Unclassed State Forests | | | 100 | | |
| Strip Plantations | | | | 100 | |
| Village Homesteads | | | | 100 | |
| All remaining national categories | | | 100 | | |
| Haor, Baor & Lakes | | | | | 100 |
| Rivers | | | | | 100 |
| Ponds | | | | | 100 |

(Note: Inland water bodies' areas will be calibrated (set equal to) with area of Inland water bodies in FAOSTAT. The area of the land remaining after accounting forests and other wooded land will be allocated to the category of "other land")

1.5 Data for National reporting table T1

| FRA 2005 Categories | Area (1000 hectares) | | |
|---|----------------------|--------------|--------------|
| | 1990 | 2000 | 2005 |
| Forest | 882 | 884 | 871 |
| Other wooded land | 44 | 53 | 58 |
| Other land | 12091 | 12080 | 12088 |
| Other land of which with tree cover ¹⁾ | 343 | 343 | 343 |
| Inland water bodies | 1383 | 1383 | 1383 |
| TOTAL | 14400 | 14400 | 14400 |

1) Area of "Other land with tree cover" is included in the area reported under "Other land" and should therefore be excluded when calculating the total area for the country.

1.6 Comments to National reporting table T1

There is no single national inventory, hence various estimation and forecasting has been done for each sub-national inventory or assessment area.

2 Table T2 – Ownership of Forest and Other wooded land

2.1 FRA 2005 Categories and definitions

| Category | Definition |
|-------------------|---|
| Private ownership | Land owned by individuals, families, private co-operatives, corporations, industries, religious and educational institutions, pension or investment funds, and other private institutions. |
| Public ownership | Land owned by the State (national, state and regional governments) or government-owned institutions or corporations or other public bodies including cities, municipalities, villages and communes. |
| Other ownership | Land that is not classified either as “Public ownership” or as “Private ownership”. |

2.2 National data

2.2.1 Data sources

| References to sources of information | Quality (H/M/L) | Variable(s) | Information Year(s) |
|---|-----------------|----------------------|---------------------------|
| FMP, 1993. Forestry Master Plan, Ministry of Environment and Forest, Government of Bangladesh. GOB (Government of Bangladesh) 1993. Asian Development Bank (UNDP/FAO/BGD/88/025). Main and supporting volumes | M | Ownership of Forests | 1985, 1990, 1991 and 1992 |
| ANON, 2004. Office Letter of BFIDC, No. 455 Dated : 19-12-2004. | M | Rubber Plantations | 2004 |

2.2.2 Classification and definitions

There are not specific national definitions to define private and public ownership of forests etc. The general concept of private and public ownership is same as contained in FAO definitions.

2.2.2 Original data

All forests, plantations and scattered trees on legal forest lands are publicly owned. The rubber plantations are both under public and private ownership (FMP. 1993 and Anon, 2004).

| Rubber plantations | Extent and (Percentage) of ownership | | |
|--------------------|--------------------------------------|--------------------|--------------------|
| | 1990 | 2000 | 2005 |
| Private ownership | 0 | 15.630 (44.12%) | 15.630 (44.12%) |
| Public ownership | 19.800 (100%) | 19.800 (55.88%) | 19.800 (55.88%) |
| Other ownership | 0 | 0 | 0 |
| TOTAL | 19.800 | 35.430 | 35.430 |

2.3 Analysis and processing of national data

2.3.1 Calibration

Not needed

2.3.2 Estimation and forecasting

Not needed

2.4 Reclassification into FRA 2005 classes

| Categories of Forests and Other Wooded lands | Ownership | |
|--|-----------|---------|
| | Public | Private |
| Hill, Plains and Littoral forests and Forest plantations | 100% | |
| Scattered trees on legal forest lands | 100% | |
| Un-classed State Forests | 100% | |
| Rubber Plantation in 1990 | | 100% |
| Rubber Plantation in 2000 and 2005 | 55.88% | 44.12% |

2.5 Data for National reporting table T2

| FRA 2005 Categories | Area (1000 hectares) | | | | | |
|---------------------|----------------------|------|------|-------------------|------|------|
| | Forest | | | Other wooded land | | |
| | 1990 | 2000 | 2005 | 1990 | 2000 | 2005 |
| Private ownership | 0 | 16 | 16 | | | |
| Public ownership | 882 | 868 | 855 | 44 | 53 | 58 |
| Other ownership | 0 | 0 | 0 | | | |
| TOTAL | 882 | 884 | 871 | 44 | 53 | 58 |

2.6 Comments to National reporting table T2

3 Table T3 – Designated function of Forest and Other wooded land

3.1 FRA 2005 Categories and definitions

Types of designation

| Category | Definition |
|--------------------------|--|
| Primary function | A designated function is considered to be primary when it is significantly more important than other functions. This includes areas that are legally or voluntarily set-aside for specific purposes. |
| Total area with function | Total area where a specific function has been designated, regardless whether it is primary or not. |

Designation categories

| Category / Designated function | Definition |
|--------------------------------|--|
| Production | Forest / Other wooded land designated for production and extraction of forest goods, including both wood and non-wood forest products. |
| Protection of soil and water | Forest / Other wooded land designated for protection of soil and water. |
| Conservation of biodiversity | Forest / Other wooded land designated for conservation of biological diversity. |
| Social services | Forest / Other wooded land designated for the provision of social services. |
| Multiple purpose | Forest / Other wooded land designated to any combination of: production of goods, protection of soil and water, conservation of biodiversity and provision of social services and where none of these alone can be considered as being significantly more important than the others. |
| No or unknown function | Forest / Other wooded land for which a specific function has not been designated or where designated function is unknown. |

3.2 National data

3.2.1 Data sources

| References to sources of information | Quality (H/M/L) | Variable(s) | Information Year(s) |
|---|-----------------|--------------------|---------------------------|
| FMP, 1993. Forestry Master Plan, Ministry of Environment and Forest, Government of Bangladesh. GOB (Government of Bangladesh) 1993. Asian Development Bank (UNDP/FAO/BGD/88/025). Main and supporting volumes | M | Designation | 1985, 1990, 1991 and 1992 |
| ANON, 2004. Office Letter of BFIDC, No. 455 of 19 th December 2004. | M | Rubber Plantations | 2004 |

3.2.2 Classification and definitions

Following has been assumed since there is no national classification by designation for forests.

| Main function of Forest | Description |
|------------------------------|---|
| Forests | |
| Production | Hill and Plains Forests less areas under forests designated for Conservation, Social services and Protection of Soil and water. |
| | All Rubber Plantation |
| Protection of Soil and Water | Rankheong and Kassalong in Chittagong Hill tracts |
| Conservation of Biodiversity | Protected Areas (PA) |
| Social Services | Selected areas in Forests . |
| Multiple Purpose | All Littoral forests less area of PA in littoral forests |

3.2.3 Original data

A. Protected Areas

| Forest Areas | Protected Area | Area in 000 ha | | |
|----------------------------|-------------------------|--------------------|---------------|---------------|
| | | 1990 | 2000 | 2005 |

3.5 Comments to National reporting table T3

4 Table T4 – Characteristics of Forest and Other wooded land

4.1 FRA 2005 Categories and definitions

| Category | Definition |
|-----------------------|--|
| Primary | Forest / Other wooded land of native species, where there are no clearly visible indications of human activities and the ecological processes are not significantly disturbed. |
| Modified natural | Forest / Other wooded land of naturally regenerated native species where there are clearly visible indications of human activities. |
| Semi-natural | Forest / Other wooded land of native species, established through planting, seeding or assisted natural regeneration. |
| Productive plantation | Forest / Other wooded land of introduced species, and in some cases native species, established through planting or seeding mainly for production of wood or non wood goods. |
| Protective plantation | Forest / Other wooded land of native or introduced species, established through planting or seeding mainly for provision of services. |

4.2 National data

4.2.1 Data sources

| References to sources of information | Quality (H/M/L) | Variable(s) | Information Year(s) |
|---|-----------------|--------------------|---------------------------|
| FMP, 1993. Forestry Master Plan, Ministry of Environment and Forest, Government of Bangladesh. GOB (Government of Bangladesh) 1993. Asian Development Bank (UNDP/FAO/BGD/88/025). Main and supporting volumes | M | Characteristics | 1985, 1990, 1991 and 1992 |
| ANON, 2004. Office Letter of BFIDC, No. 455 Dated : 19-12-2004. | M | Rubber Plantations | 2004 |

4.2.1 Classification and definitions: No comment

There no national definitions relevant to his table. The following assumption has been made to address information requirement of this table T4.

| FRA Category | National Forests that match the FRA Category |
|-----------------------|--|
| Primary | Nil |
| Modified Natural | All forests less plantations |
| Semi-Natural | Nil |
| Productive Plantation | All forest plantations less protective plantations |
| | Rubber plantation |
| Protective plantation | Plantations in PA areas |
| | Plantations in Littoral forests |

4.2.3 Original data

This table uses data from Table T1 and Table T3. The following table provides some more information on plantations.

| Plantations | Area in 000 ha | | |
|--|----------------|---------------|---------------|
| | 1990 | 2000 | 2005 |
| Protective Plantations | | | |
| Teknaf GR | 2.40 | 2.40 | 2.40 |
| Chunati WS | 1.45 | 1.45 | 1.45 |
| Sundarbans | 0.26 | 0.22 | 0.22 |
| Costal Afforestation | 61.64 | 76.53 | 79.50 |
| Sub Total | 65.75 | 80.60 | 83.56 |
| Productive plantation (Total less protective) | 173.04 | 194.61 | 194.55 |
| Total Plantation | 238.79 | 270.74 | 278.11 |

4.3 Analysis and processing of national data

4.3.1 Calibration

This step is not needed.

4.3.2 Estimation and forecasting

This step is not needed.

4.4 Reclassification into FRA 2005 classes

| National Class | FRA 2005 categories | | | | |
|-------------------------|---------------------|------------------|--------------|-----------------------|-----------------------|
| | Primary | Modified Natural | Semi natural | Productive plantation | Protective plantation |
| Protective Plantations | | | | | 100 |
| Productive Plantations | | | | 100 | |
| Forest less Plantations | | 100 | | | |

4.5 Data for National reporting table T4

| FRA 2005 Categories | Area (1000 hectares) | | | | | |
|-----------------------|----------------------|------------|------------|-------------------|------|------|
| | Forest | | | Other wooded land | | |
| | 1990 | 2000 | 2005 | 1990 | 2000 | 2005 |
| Primary | | | | | | |
| Modified natural | 643 | 608 | 592 | | | |
| Semi-natural | | | | | | |
| Productive plantation | 173 | 195 | 195 | | | |
| Protective plantation | 66 | 81 | 84 | | | |
| TOTAL | 882 | 884 | 871 | | | |

4.6 Comments to National reporting table T4

5 Table T5 – Growing stock

5.1 FRA 2005 Categories and definitions

| Category | Definition |
|--------------------------|--|
| Growing stock | Volume over bark of all living trees more than X cm in diameter at breast height (or above buttress if these are higher). Includes the stem from ground level or stump height up to a top diameter of Y cm, and may also include branches to a minimum diameter of W cm. |
| Commercial growing stock | The part of the growing stock of species that are considered as commercial or potentially commercial under current market conditions, and with a diameter at breast height of Z cm or more. |

5.3 Analysis and processing of national data

5.3.1 Calibration

This step is not needed

5.3.2 Estimation and forecasting

A. Volume per ha in 1990, 2000 and 2005

The linear interpolation and extrapolation method has been used where more than one point in time information is available otherwise more realistic or only data has been assumed. This excludes Rubber plantations.

a. Hills

| Forests | Forest Type | Volume per ha (m ³ /ha) | | |
|-------------------|----------------|------------------------------------|--------|--------|
| | | 1990 | 2000 | 2005 |
| Chiitagong | Natural Forest | 25.83 | 10.87 | 3.39 |
| | Plantations | 29.84 | 11.94 | 2.99 |
| Sylhet | Natural Forest | 47.58 | 53.20 | 56.01 |
| | Plantations | 49.85 | 37.60 | 31.47 |
| Cox Bazar | Natural Forest | 76.12 | 74.36 | 73.48 |
| | Plantations | 32.67 | 19.42 | 12.79 |
| Kasalong | Natural Forest | 94.72 | 110.78 | 114.67 |
| | Plantations | 30.00 | 30.00 | 30.00 |
| Rankhiang | Natural Forest | 73.16 | 67.47 | 66.09 |
| | Plantations | 30.00 | 30.00 | 30.00 |
| Sita Phar | Natural Forest | 47.69 | 47.69 | 47.69 |
| | Plantations | 179.86 | 179.86 | 179.86 |
| Sanghu Matamuhuri | Natural Forest | 76.51 | 76.51 | 76.51 |

Other plantations in Hills

| Areas | Forest Type | Volume per ha (m ³ /ha) | | |
|--------------------|-------------|------------------------------------|-------|-------|
| | | 1990 | 2000 | 2005 |
| Khagrachari | Plantations | 36.90 | 36.90 | 36.90 |
| Bandarban Pulpwood | Plantations | 23.88 | 23.88 | 23.88 |
| Bandarban | Plantations | 19.61 | 19.61 | 19.61 |
| Kaptai Pulpwood | Plantations | 20.11 | 20.11 | 20.11 |
| Jhum control | Plantations | 25.91 | 25.91 | 25.91 |

b. Plains Forests

| Areas | Forest Type | Volume per ha (m ³ /ha) | | |
|------------|-----------------|------------------------------------|-------|-------|
| | | 1990 | 2000 | 2005 |
| Dhaka | Natural forests | 48.1 | 48.1 | 48.1 |
| | Plantation | 37.6 | 37.6 | 37.6 |
| Tangail | Natural forests | 41.5 | 41.5 | 41.5 |
| | Plantation | 45.7 | 45.7 | 45.7 |
| Mymensingh | Natural forests | 70.8 | 70.8 | 70.8 |
| | Plantation | 52.9 | 52.9 | 52.9 |
| Dinajpur | Natural forests | 91.1 | 91.1 | 91.1 |
| | Plantation | 60.3 | 60.3 | 60.3 |
| Rangpur | Natural forests | 275.4 | 275.4 | 275.4 |
| | Plantation | 62.6 | 62.6 | 62.6 |
| Rajshahi | Natural forests | 70.5 | 70.5 | 70.5 |
| | Plantation | 59.3 | 59.3 | 59.3 |

c. Littoral Forests

| Areas | Forest Type | Volume per ha (m ³ /ha) | | |
|-----------------------|-----------------|------------------------------------|-------|-------|
| | | 1990 | 2000 | 2005 |
| Sunderbans | Natural forests | 27.23 | 27.50 | 27.64 |
| Coastal Afforestation | Plantation | 35.73 | 13.50 | 13.50 |

B. Growing Stock

The “Area” and “Per hectare volume” estimates yield the following figures of growing stock in 1990, 2000 and 2005.

| Region | Volume in 000 m ³ | | |
|--------------|------------------------------|--------------|--------------|
| | 1990 | 2000 | 2005 |
| Hills | 19339 | 17258 | 16027 |
| Plains | 2069 | 1977 | 1968 |
| Littoral | 13143 | 11967 | 12004 |
| Total | 34550 | 31202 | 29998 |

5.4 Reclassification into FRA 2005 classes

This step is not needed.

5.5 Data for National reporting table T5

| FRA 2005 Categories | Volume (million cubic meters over bark) | | | | | |
|--------------------------|---|------|------|-------------------|------|------|
| | Forest | | | Other wooded land | | |
| | 1990 | 2000 | 2005 | 1990 | 2000 | 2005 |
| Growing stock | 34.5 | 31.2 | 30.0 | n.a. | n.a. | n.a. |
| Commercial growing stock | 25.9 | 23.4 | 22.5 | n.a. | n.a. | n.a. |

(Note commercial growing stock is assumed to be 75% of the total growing stock)

| Specification of country threshold values | Unit | Value | Complementary information |
|---|------------|-------|---------------------------|
| 1. Minimum diameter at breast height of trees included in Growing stock (X) | Cm | 5 | |
| 2. Minimum diameter at the top end of stem (Y) for calculation of Growing stock | Cm | 10 | |
| 3. Minimum diameter of branches included in Growing stock (W) | Cm | 20 | |
| 4. Minimum diameter at breast height of trees in Commercial growing stock (Z) | Cm | 10 | |
| 5. Volume refers to “Above ground” (AG) or “Above stump” (AS) | AG / AS | AS | |
| 6. Have any of the above thresholds (points 1 to 4) changed since 1990 | Yes/No | No | |
| 7. If yes, then attach a separate note giving details of the change | Attachment | NA | |

5.6 Comments to National reporting table T5

Above excludes growing stock of rubber plantations for which no estimate is available.

6 Table T6 – Biomass stock

6.1 FRA 2005 Categories and definitions

| Category | Definition |
|----------------------|---|
| Above-ground biomass | All living biomass above the soil including stem, stump, branches, bark, seeds, and foliage. |
| Below-ground biomass | All living biomass of live roots. Fine roots of less than 2mm diameter are excluded because these often cannot be distinguished empirically from soil organic matter or litter. |
| Dead wood biomass | All non-living woody biomass not contained in the litter, either standing, lying on the ground, or in the soil. Dead wood includes wood lying on the surface, dead roots, and stumps larger than or equal to 10 cm in diameter or any other diameter used by the country. |

6.2 National data

6.2.1 Data Sources

| References to sources of information | Quality (H/M/L) | Variable(s) | Year(s) |
|---|-----------------|---|---------|
| GPG, 2003. Good Practise Guidance for Land-use, Land-use Change and Forestry. IPCC. | H | Basic Densities, Root: Shoot Ratio, Dead to Live Ration | All |
| Sandra Brown, 1997. Estimating Biomass Change in Topical Forests. A Primer. FAO Forestry Paper No. 134. | H | Biomass Expansion Factor | All |

6.2.2 Classification and definitions

There are no national definitions or classes relevant to this table

6.2.3 Original data

This table uses data form Table 5 and factors fro GPG (2003).

6.3 Analysis and processing of national data

6.3.1 Calibration

This step is not needed.

6.3.2 Estimation and forecasting

A. Stem biomass

Stem biomass has been calculated with “average wood density” of 0.5.

| Variables | Forest | | |
|----------------------------------|--------|------|------|
| | 1990 | 2000 | 2005 |
| Total Growing Stock (million m3) | 34.5 | 31.2 | 30.0 |
| Average Wood Density | 0.5 | 0.5 | 0.5 |
| Stem biomass (million tonnes) | 17 | 16 | 15 |

B. Biomass Expansion Factor

The BEFs was calculated by using following formula of Sandra Brown (1997).

$$BEF = EXP(3.213 - 0.506 * LN(\text{Stem biomass in tonnes per hectare}))$$

It provides a BEF value exceeding 5 which was considered as unrealistic therefore the maximum default value of 3.4 for tropical forest was adopted from GPG (2003).

C. Above Ground Biomass

The following estimates of “Above Ground Biomass” have been developed by using the above figures of stem biomass and BEF.

| Variable | Unit | Forest | | |
|----------------------|----------------|--------|------|------|
| | | 1990 | 2000 | 2005 |
| Stem biomass | Million tonnes | 17.3 | 15.6 | 15.0 |
| BEF | | 3.4 | 3.4 | 3.4 |
| Above Ground Biomass | Million tonnes | 59 | 53 | 51 |

D. Below Ground Biomass

A default value of 0.24 for the Root to Shoot ratio (ratio of below ground bio-mass and above ground biomass) has been adopted from GPG (2003).

| Variable | Unit | Forest | | |
|----------------------|----------------|--------|------|------|
| | | 1990 | 2000 | 2005 |
| Above Ground Biomass | Million tonnes | 59 | 53 | 51 |
| Root to shoot ratio | | 0.24 | 0.24 | 0.24 |
| Below Ground Biomass | Million tonnes | 14 | 13 | 12 |

E. Deadwood Biomass

It has been calculated by adopting a default value of 0.11 for dead to total live biomass (total of above and below ground biomass) ratio from GPG (2003).

| Variable | Unit | Forest | | |
|--------------------|----------------|--------|------|------|
| | | 1990 | 2000 | 2005 |
| Total Live Biomass | Million tonnes | 73 | 66 | 63 |
| Dead to live ratio | | 0.11 | 0.11 | 0.11 |
| Dead Wood Biomass | Million tonnes | 8 | 7 | 7 |

6.4 Reclassification into FRA 2005 classes

This step is not needed.

6.5 Data for National reporting table T6

| FRA 2005 Categories | Biomass (million metric tonnes oven-dry weight) | | | | | |
|----------------------|---|------|------|-------------------|------|------|
| | Forest | | | Other wooded land | | |
| | 1990 | 2000 | 2005 | 1990 | 2000 | 2005 |
| Above-ground biomass | 59 | 53 | 51 | n.a. | n.a. | n.a. |
| Below-ground biomass | 14 | 13 | 12 | n.a. | n.a. | n.a. |
| Dead wood biomass | 8 | 7 | 7 | n.a. | n.a. | n.a. |
| TOTAL | 81 | 73 | 70 | n.a. | n.a. | n.a. |

6.6 Comments to National reporting table

Above excludes biomass stock of rubber plantations for which no estimate is available.

7 Table T7 – Carbon stock

7.1 FRA 2005 Categories and definitions

| Category | Definition |
|--------------------------------|---|
| Carbon in above-ground biomass | Carbon in all living biomass above the soil, including stem, stump, branches, bark, seeds, and foliage. |
| Carbon in below-ground biomass | Carbon in all living biomass of live roots. Fine roots of less than 2 mm diameter are excluded, because these often cannot be distinguished empirically from soil organic matter or litter. |
| Carbon in dead wood biomass | Carbon in all non-living woody biomass not contained in the litter, either standing, lying on the ground, or in the soil. Dead wood includes wood lying on the surface, dead roots, and stumps larger than or equal to 10 cm in diameter or any other diameter used by the country. |
| Carbon in litter | Carbon in all non-living biomass with a diameter less than a minimum diameter chose by the country for lying dead (for example 10 cm), in various states of decomposition above the mineral or organic soil. This includes the litter, fomic, and humic layers. |
| Soil carbon | Organic carbon in mineral and organic soils (including peat) to a specified depth chosen by the country and applied consistently through the time series. |

7.2 National data

7.2.1 Data sources

| References to sources of information | Quality (H/M/L) | Variable(s) | Year(s) |
|---|-----------------|---|---------|
| GPG, 2003. Good Practise Guidance for Land-use, Land-use Change and Forestry. IPCC. | H | Basic Densities, Root: Shoot Ratio, Dead to Live Ration | All |

7.2.2 Classification and definitions

No national classification or definitions relevant to this table are available.

7.2.3 Original data

Information from Table 6 along with the default value (GPG, 2003) for carbon density of 0.5 has been used for this table.

7.3 Analysis and processing of national data

7.3.1 Calibration

This step is not necessary.

7.3.2 Estimation and forecasting

A. Carbon in live biomass

The carbon content has been calculated by using the GPG (2003) default factor of 0.5.

| Variables | Units | Forest | | |
|--------------------------------|----------------|--------|------|------|
| | | 1990 | 2000 | 2005 |
| Carbon in Above Ground Biomass | million tonnes | 29 | 27 | 25 |
| Carbon in Below Ground Biomass | million tonnes | 7 | 6 | 6 |

B. Carbon in Deadwood biomass

The carbon content has been calculated by using the GPG (2003) default factor of 0.5.

| Variables | Units | Forest | | |
|-----------------------------|----------------|--------|------|------|
| | | 1990 | 2000 | 2005 |
| Carbon in Dead Wood Biomass | million tonnes | 4 | 4 | 3 |

C. Carbon in litter

It has been calculated by using default value of 1 for tropical forest in GPG (2003).

| Variables | Units | Forest | | |
|----------------------------------|----------------|--------|------|------|
| | | 1990 | 2000 | 2005 |
| Forest Area Table1 (less rubber) | 000 ha | 863 | 848 | 836 |
| Carbon in forest litter/ha | tonnes/ha | 1.0 | 1.0 | 1.0 |
| Carbon in Forest Litter | million tonnes | 1 | 1 | 1 |

7.4 Reclassification into FRA 2005 classes

This step is not needed

7.5 Data for National reporting table T7

| FRA 2005 Categories | Carbon (Million metric tonnes) | | | | | |
|--|--------------------------------|-----------|-----------|-------------------|------|------|
| | Forest | | | Other wooded land | | |
| | 1990 | 2000 | 2005 | 1990 | 2000 | 2005 |
| Carbon in above-ground biomass | 29 | 27 | 25 | n.a. | n.a. | n.a. |
| Carbon in below-ground biomass | 7 | 6 | 6 | n.a. | n.a. | n.a. |
| Sub-total: Carbon in living biomass | 36 | 33 | 32 | n.a. | n.a. | n.a. |
| Carbon in dead wood | 4 | 4 | 3 | n.a. | n.a. | n.a. |
| Carbon in litter | 1 | 1 | 1 | n.a. | n.a. | n.a. |
| Sub-total: Carbon in dead wood and litter | 5 | 4 | 4 | n.a. | n.a. | n.a. |
| Soil carbon to a depth of _____ cm | n.a. | n.a. | n.a. | n.a. | n.a. | n.a. |
| TOTAL CARBON | 41 | 37 | 36 | n.a. | n.a. | n.a. |

7.6 Comments to National reporting table T7

It excludes carbon stock of rubber plantations for which no estimate is available.

8 Table T8 – Disturbances affecting health and vitality

8.1 FRA 2005 Categories and definitions

| Category | Definition |
|-------------------------|--|
| Disturbance by fire | Disturbance caused by wildfire, independently whether it broke out inside or outside the forest/OWL. |
| Disturbance by insects | Disturbance caused by insect pests that are detrimental to tree health. |
| Disturbance by diseases | Disturbance caused by diseases attributable to pathogens, such as bacteria, fungi, phytoplasma or virus. |
| Other disturbance | Disturbance caused by other factors than fire, insects or diseases. |

8.2 National data

8.2.1 Data sources

| References to sources of information | Quality (H/M/L) | Variable(s) | Year(s) |
|---|-----------------|--------------------|---------|
| Anon. 2004. Office record of Bangladesh Forest department and Bangladesh Forest Research Institute. Bangladesh. | M | Insect and Disease | 2000 |

8.2.2 Classification and definitions

No national classification or definitions relevant to this table are available.

8.2.3 Original data

Currently, there is no data available on disturbances affecting fire. The annual average area affected by insects is about 73 ha and that from disease is 6 ha.

8.3 Analysis and processing of national data

8.3.1 Calibration

This step is not necessary.

8.3.2 Estimation and forecasting

This step is not necessary.

8.4 Reclassification into FRA 2005 classes

This step is not necessary.

8.5 Data for National reporting table T8

| FRA-2005 Categories | Average annual area affected (1000 hectares) | | | |
|-------------------------|--|-------|-------------------|------|
| | Forests | | Other wooded land | |
| | 1990 | 2000 | 1990 | 2000 |
| Disturbance by fire | n.a. | n.a. | n.a. | n.a. |
| Disturbance by insects | n.a. | 0.073 | n.a. | n.a. |
| Disturbance by diseases | n.a. | 0.006 | n.a. | n.a. |
| Other disturbance | n.a. | n.a. | n.a. | n.a. |

8.6 Comments to National reporting table T8

9 Table T9 – Diversity of tree species

9.1 FRA 2005 Categories and definitions

| Category | Definition |
|--|--|
| Number of native tree species | The total number of native tree species that have been identified within the country. |
| Number of critically endangered tree species | The number of native tree species that are classified as “Critically endangered” in the IUCN red list. |
| Number of endangered tree species | The number of native tree species that are classified as “Endangered” in the IUCN red list. |
| Number of vulnerable tree species | The number of native tree species that are classified as “Vulnerable” in the IUCN red list. |

9.2 National data

9.2.1 Data sources

| References to sources of information | Quality (H/M/L) | Variable(s) | Year(s) |
|--|-----------------|----------------------|---------|
| Jalil, M. A. 2000. Country report submitted to the 18 th Asia Pacific Forestry Commission, held in Australia during May 2000. | H | Native plant species | 2000 |
| Khan, M.S. 1977. Flora of Bangladesh. Report 4. <i>Camelinaceae</i> . Bangladesh National Herbarium, Bangladesh Agriculture Research Council (BARC), Farm gate, Dhaka. | H | Native plant species | 1977 |
| Khan, M. S., Rahman, M. M. and Ali, M. A. 2001, Red Data Book of Vascular Plants of Bangladesh, Bangladesh National Herbarium, Dhaka, Page 179. | H | Threatened species | 2000 |
| Latif, M.A., Alam, M. K. and Mostafa, M. 2001 Florestic Diversity Growth Characteristic and Indigenous Management Techniques of Traditional Home Garden in Bangladesh, Final Research Report, Page 135, BFRI and BARC. | H | | 2000 |
| IUCN. 2004. Red List of Threatened Species. Gland, Switzerland: The World Conservation Union. | H | Threatened species | 2004 |

9.2.2 Classification and definitions

No national information is available.

9.2.3 Original data

A. Native species

There about 1074 native tree species in forests.

B. Threatened Tree Species.

National publications indicate about 106 number of endangered forest species in Bangladesh. The IUCN Red list of 2004 indicates following 4 critically endangered species, 2 endangered species, and 6 vulnerable species.

Critically Endangered Species -4

- 1 *Anisoptera scaphula*
- 2 *Dipterocarpus gracilis*
- 3 *Dipterocarpus turbinatus*
- 4 *Vatica lanceaefolia*

Endangered Species – 2

- 1 *Dipterocarpus alatus*
- 2 *Dipterocarpus costatus*

Vulnerable Species -6

- 1 *Aglaia chittagonga*
- 2 *Aglaia perviridis*
- 3 *Aquilaria malaccensis*
- 4 *Elaeocarpus prunifolius*
- 5 *Hopea odorata*
- 6 *Knema bengalensis*

9.3 Data for National reporting table T9

| FRA 2005 Categories | Number of species (year 2000) |
|------------------------------------|----------------------------------|
| Native tree species | 1074 |
| Critically endangered tree species | 4 |
| Endangered tree species | 2 |
| Vulnerable tree species | 6 |

9.4 Comments to National reporting table T9

10 Table T10 – Growing stock composition

Species-wise break down of the growing stock for all the sub-national inventory areas is not available.

11 Table T11 – Wood removal

11.1 FRA 2005 Categories and definitions

| Category | Definition |
|-------------------------|--|
| Industrial wood removal | The wood removed (volume of round wood over bark) for production of goods and services other than energy production (wood fuel). |
| Wood fuel removal | The wood removed for energy production purposes, regardless whether for industrial, commercial or domestic use. |

11.2 National data

11.2.1 Data sources

| References to sources of information | Quality (H/M/L) | Variable(s) | Year(s) |
|---|-----------------|--------------|--------------|
| Anon. 2004. Office record of Bangladesh Forest department and Bangladesh Forest Research Institute. Bangladesh. | M | Wood removal | 2004 |
| SYB. 1997. Statistical Year Book, 1997. Bangladesh Statistical Division. Ministry of Planning. Bangladesh. | M | Wood Removal | 1987 to 1994 |
| GOB. 1992. Forest Statistics of Bangladesh. Bangladesh | M | Wood removal | 1985 |

11.2.2 Classification and definitions

No national definitions or classifications are available.

11.2.3 Original data

| Type of wood | Wood removal in 000 m ³ | | | | | |
|----------------------|------------------------------------|------|------|------|------|------|
| | 1988 | 1989 | 1990 | 1991 | 1992 | 2004 |
| Industrial roundwood | 350 | 190 | 240 | 190 | 230 | 252 |
| Wood Fuel | 790 | 380 | 1080 | 370 | 190 | 986 |

11.3 Analysis and processing of national data

11.3.1 Estimation and forecasting

A five year average has been calculated for 1990. The averaged 1990 figure along with 2004 original figure has been used for linear interpolation and extrapolation to estimate and forecast figures for 2000 and 2005.

| Category | Wood Removal in “000”m ³ | | |
|-----------------|-------------------------------------|------|------|
| | 1990 | 2000 | 2005 |
| Industrial wood | 240 | 249 | 253 |
| Wood fuel | 562 | 865 | 1016 |
| Total | 802 | 1113 | 1269 |

11.4 Reclassification into FRA 2005 classes

This step is not needed.

11.5 Data for National reporting table T11

| FRA 2005 Categories | Volume in 1000 cubic meters of round wood over bark | | | | | |
|--------------------------|---|------|------|-------------------|------|------|
| | Forest | | | Other wooded land | | |
| | 1990 | 2000 | 2005 | 1990 | 2000 | 2005 |
| Industrial round wood | 240 | 249 | 253 | | | |
| Wood fuel | 562 | 865 | 1016 | | | |
| TOTAL for Country | 802 | 1113 | 1269 | | | |

(Wood removal from Other wooded lands is included in forests)

11.6 Comments to National reporting table T11

12 Table T12 – Value of wood removal

12.1 FRA 2005 Categories and definitions

| Category | Definition |
|----------------------------------|--|
| Value of industrial wood removal | Value of the wood removed for production of goods and services other than energy production (wood fuel). |
| Value of wood fuel removal | Value of the wood removed for energy production purposes, regardless whether for industrial, commercial or domestic use. |

12.2 National data

12.2.1 Data Sources

| References to sources of information | Quality (H/M/L) | Variable(s) | Year(s) |
|---|-----------------|-----------------------|---------|
| Anon. 2004. Office record of Bangladesh Forest department and Bangladesh Forest Research Institute. Bangladesh. | M | Value of Wood removal | 2004 |

12.2.2 Classification and definitions

12.2.3 Original data

Information was available for price of timber and fuelwood in 2004 which has been assumed for 2005 and projected backwards for 1990 and 2000.

A. Industrial Roundwood

| | 1990 | 2000 | 2005 |
|-------------------------------|--------|-------|-------|
| Price in Takka/m ³ | 3644 | 4287 | 5043 |
| Exchange | 35.79 | 54.00 | 60.00 |
| Price in \$/m ³ | 101.80 | 79.38 | 84.05 |

B. Woodfuel

| | 1990 | 2000 | 2005 |
|-------------------------------|-------|--------|--------|
| Price in Takka/m ³ | 98.98 | 116.45 | 137.00 |
| Exchange | 35.79 | 54.00 | 60.00 |
| Price in \$/m ³ | 2.77 | 2.16 | 2.28 |

12.3 Analysis and processing of national data

12.3.1 Estimation and forecasting

The prices in US dollars have been applied to quantity of wood removal in Table 11 to calculate value of removal.

| FRA 2005 Categories | Value of round wood removal (1000 USD) | | | | | |
|--------------------------|--|-------|-------|-------------------|------|------|
| | Forest | | | Other wooded land | | |
| | 1990 | 2000 | 2005 | 1990 | 2000 | 2005 |
| Industrial round wood | 24433 | 19732 | 21253 | | | |
| Wood fuel | 1554 | 1865 | 2321 | | | |
| TOTAL for Country | 25987 | 21597 | 23573 | | | |

(Value of wood removal from OWL is included in Forests)

12.4 Reclassification into FRA 2005 classes

This step is not necessary.

12.5 Data for National reporting table T12

| FRA 2005 Categories | Value of round wood removal (1000 USD) | | | | | |
|--------------------------|--|-------|-------|-------------------|------|------|
| | Forest | | | Other wooded land | | |
| | 1990 | 2000 | 2005 | 1990 | 2000 | 2005 |
| Industrial round wood | 24433 | 19732 | 21253 | | | |
| Wood fuel | 1554 | 1865 | 2321 | | | |
| TOTAL for Country | 25987 | 21597 | 23573 | | | |

(Value of wood removal from OWL is included in Forests)

12.6 Comments to National reporting table T12

13 Table T13 – Non-wood forest product removal

13.1 FRA 2005 Categories and definitions

The following categories of non-wood forest products have been defined:

| Category |
|--|
| <u>Plant products / raw material</u> |
| 1. Food |
| 2. Fodder |
| 3. Raw material for medicine and aromatic products |
| 4. Raw material for colorants and dyes |
| 5. Raw material for utensils, handicrafts & construction |
| 6. Ornamental plants |
| 7. Exudates |
| 8. Other plant products |
| |
| <u>Animal products / raw material</u> |
| 9. Living animals |
| 10. Hides, skins and trophies |
| 11. Wild honey and bee-wax |
| 12. Bush meat |
| 13. Raw material for medicine |
| 14. Raw material for colorants |
| 15. Other edible animal products |
| 16. Other non-edible animal products |

13.2 National data

13.2.1 Data sources

| References to sources of information | Quality (H/M/L) | Variable(s) | Year(s) |
|--|-----------------|-----------------------|---------|
| FAO. 2002. Non-Wood Forest Products in 15 Countries of Tropical Asia an Overview. EC-FAO Partnership Programme (2000-2002). FAO Regional Office for Asia and the Pacific. Bangkok, Thailand. | M | NWFP Removal | 1998 |
| Anon. 2004. Office record of Bangladesh Forest department and Bangladesh Forest Research Institute. Bangladesh. | M | Value of Wood removal | 2004 |

13.2.2 Classification and definitions

No national definitions and classification relevant to this table are available.

13.2.3 Original data

Following information on annual removal of NWFP in 2004 is available.

| National NWFP | Unit | Quantity | FRA 2005 Category |
|--------------------|------------|----------|---|
| | | | Plant product /raw material |
| Golpatta | Metric ton | 21410 | Food |
| Casanut | Metric ton | 1.5 | Food |
| Velua | Metric ton | 16.8 | Other plant products |
| Hoglapata | Metric ton | 2220 | Other plant products |
| Sungrass/grass | Metric ton | 9044 | Raw material for utensils, handicrafts & construction |
| Nal khagra (Reeds) | Metric ton | 1921 | Raw material for utensils, handicrafts & construction |
| Cane | Metric ton | 29.7 | Raw material for utensils, handicrafts & construction |
| Bark | Metric ton | 339 | Raw material for utensils, handicrafts & construction |
| Dhansi | Metric ton | 1613 | Raw material for utensils, handicrafts & construction |
| | | | |
| | | | Animal Products/ raw material |
| Shell | Metric ton | 1213 | Hides, skins and trophies |
| Fishes | Metric ton | 22981 | Other edible animal products |
| Crab | Metric ton | 705 | Other edible animal products |
| Wax | Metric ton | 0.9 | Wild honey and bee-wax |
| Honey | Metric ton | 89 | Wild honey and bee-wax |

13.3 Analysis and processing of national data

This step is not needed.

13.4 Reclassification into FRA 2005 classes

This step is not needed as matching FRA 2005 classes are already provided with original data.

13.5 Data for National reporting table T13

| FRA 2005 Categories | Scale factor | Unit | NWFP removal | | |
|--|--------------|------|--------------|------|-------|
| | | | 1990 | 2000 | 2005 |
| <u>Plant products / raw material</u> | | | | | |
| 1. Food | | MT | n.a | n.a | 21412 |
| 2. Fodder | | | n.a | n.a | n.a |
| 3. Raw material for medicine and aromatic products | | | n.a | n.a | n.a |
| 4. Raw material for colorants and dyes | | | n.a | n.a | n.a |
| 5. Raw material for utensils, handicrafts & construction | | MT | n.a | n.a | 12947 |
| 6. Ornamental plants | | | n.a | n.a | n.a |
| 7. Exudates | | | n.a | n.a | n.a |
| 8. Other plant products | | MT | n.a | n.a | 2237 |

| 12. Bush meat | | | n.a | n.a | n.a |
| 13. Raw material for medicine | | | n.a | n.a | n.a |
| 14. Raw material for colorants | | | n.a | n.a | n.a |
| 15. Other edible animal products | | MT | n.a | n.a | 23686 |
| 16. Other non-edible animal products | | | n.a | n.a | n.a |

13.6 Comments to National reporting table T13

The above table excludes some NWFP which are not measured in tonnes or whose measurement could not be converted in tonnes.

14 Table T14 – Value of non-wood forest product removal

14.1 FRA 2005 Categories and definitions

The following categories of non-wood forest products have been defined:

| Category |
|--|
| <u>Plant products / raw material</u> |
| 1. Food |
| 2. Fodder |
| 3. Raw material for medicine and aromatic products |
| 4. Raw material for colorants and dyes |
| 5. Raw material for utensils, handicrafts & construction |
| 6. Ornamental plants |
| 7. Exudates |
| 8. Other plant products |
| |
| <u>Animal products / raw material</u> |
| 9. Living animals |
| 10. Hides, skins and trophies |
| 11. Wild honey and bee-wax |
| 12. Bush meat |
| 13. Raw material for medicine |
| 14. Raw material for colorants |
| 15. Other edible animal products |
| 16. Other non-edible animal products |

14.2 National data

13.2.1 Data sources

| References to sources of information | Quality (H/M/L) | Variable(s) | Year(s) |
|--|-----------------|-----------------------|---------|
| FAO. 2002. Non-Wood Forest Products in 15 Countries of Tropical Asia an Overview. EC-FAO Partnership Programme (2000-2002). FAO Regional Office for Asia and the Pacific. Bangkok, Thailand. | M | NWFP Removal | 1998 |
| Anon. 2004. Office record of Bangladesh Forest department and Bangladesh Forest Research Institute. Bangladesh. | M | Value of Wood removal | 2004 |

13.2.2 Classification and definitions

No national definitions and classification relevant to this table are available.

13.2.3 Original data

Following information on annual removal of NWFP in 2004 is available.

| National Category | Scale | Unit | Value | FRA 2005 Category |
|-------------------------------|-------|------|----------|---|
| Plant/raw material product | | | | |
| Golpatta (<i>Nipa</i> sp.) | 1000 | USD | 50489.05 | Food |
| Caseanut (mnd) | 1000 | USD | 133.33 | Food |

14.3 Analysis and processing of national data

This step is not needed.

14.4 Reclassification into FRA 2005 classes

This step is not needed as original data provided matching FRA 2005 categories.

14.5 Data for National reporting table T14

| FRA 2005 Categories | Value of the of NWFP removed (1000 USD) | | |
|--|--|------|--------|
| | 1990 | 2000 | 2005 |
| <u>Plant products / raw material</u> | | | |
| 1. Food | n.a. | n.a. | 50622 |
| 2. Fodder | n.a. | n.a. | n.a. |
| 3. Raw material for medicine and aromatic products | n.a. | n.a. | n.a. |
| 4. Raw material for colorants and dyes | n.a. | n.a. | n.a. |
| 5. Raw material for utensils, handicrafts & construction | n.a. | n.a. | 15854 |
| 6. Ornamental plants | n.a. | n.a. | n.a. |

| 16. Other non-edible animal products | n.a. | n.a. | n.a. |
| TOTAL | | | 199757 |

14.6 Comments to National reporting table T14

1. The above table excludes some NWFP which are not measured in tonnes or whose measurement could not be converted in tonnes.

2. The amount in this table may not correspond to quantity in Table 13.

15 Table T15 – Employment in forestry

15.1 FRA 2005 Categories and definitions

| Category | Definition |
|---------------------------------|--|
| Primary production of goods | Employment in activities related to primary production of goods, like industrial round wood, wood fuel and non-wood forest products. |
| Provision of services | Employment in activities directly related to services from forests and woodlands. |
| Unspecified forestry activities | Employment in unspecified forestry activities. |

15.2 National data

15.2.1 Data sources

| References to sources of information | Quality (H/M/L) | Variable | Year(s) |
|---|-----------------|----------|------------------------|
| FMP, 1993. Forestry Master Plan, Ministry of Environment and Forest, Government of Bangladesh. GOB.1993. Asian Development Bank (UNDP/FAO/BGD/88/025). Main and supporting volumes. | M | Extent | 1985, 1990, 1991, 1992 |

15.2.2 Classification and definitions

No national definitions and classifications relevant to this table are available.

15.2.3 Original data

The FMP (1993) estimates that at the 1990 level of primary activities, the forest land annually provides employment to about 97,900 persons or about 0.1109 person years per ha.

15.3 Analysis and processing of national data

15.3.1 Estimation and forecasting

The total number of employment on forest land in 2000 and 2005 has been calculated assuming same level of activities (or number of persons per ha) as in 1990.

| Variable | 1990 | 2000 |
|------------------------------------|--------|--------|
| Forest land (000 ha) | 882 | 879 |
| Per ha person year employment | 0.1109 | 0.1109 |
| Employment on forest land in "000" | 97.9 | 97.6 |

This total employment has been apportioned to the employment relating to the “provision of services” on the basis of percentage of area under conservation of biodiversity (Table T3) to total area of forest in 1990 and 2000 which is about 20.6%. The rest of the employment has been apportioned to the employment relating to the “production of goods”.

15.4 Reclassification into FRA 2005 classes

This step is not needed.

15.5 Data for National reporting table T15

| FRA 2005 Categories | Employment (1000 person-years) | |
|---------------------------------|--------------------------------|-------------|
| | 1990 | 2000 |
| Primary production of goods | 77.7 | 77.5 |
| Provision of services | 20.2 | 20.1 |
| Unspecified forestry activities | nda | nda |
| TOTAL | 97.9 | 97.6 |

15.6 Comments to National reporting table T15
