Special chapters of *The State of Food and Agriculture*

In addition to the usual review of the recent world food and agricultural situation, each issue of this report since 1957 has included one or more special studies on problems of longer-term interest. Special chapters in earlier issues have covered the following subjects:

- 1957** Factors influencing the trend of food consumption
Postwar changes in some institutional factors affecting agriculture
- 1958** Food and agricultural developments in Africa south of the Sahara
The growth of forest industries and their impact on the world's forests
- 1959** Agricultural incomes and levels of living in countries at different stages of economic development
Some general problems of agricultural development in less-developed countries in the light of postwar experience
- 1960** Programming for agricultural development
- 1961** Land reform and institutional change
Agricultural extension, education and research in Africa, Asia and Latin America
- 1962** The role of forest industries in the attack on economic underdevelopment
The livestock industry in less-developed countries
- 1963** Basic factors affecting the growth of productivity in agriculture
Fertilizer use: spearhead of agricultural development
- 1964** Protein nutrition: needs and prospects
Synthetics and their effects on agricultural trade
- 1966** Agriculture and industrialization
Rice in the world food economy
- 1967** Incentives and disincentives for farmers in developing countries
The management of fishery resources
- 1968** Raising agricultural productivity in developing countries through technological improvement
Improved storage and its contribution to world food supplies
- 1969** Agricultural marketing improvement programmes:
some lessons from recent experience
Modernizing institutions to promote forestry development
- 1970** Agriculture at the threshold of the Second Development Decade
- 1971** Water pollution and its effects on living aquatic resources and fisheries
- 1972** Education and training for development
Accelerating agricultural research in the developing countries
- 1973** Agricultural employment in developing countries
- 1974** Population, food supply and agricultural development
- 1975** The Second United Nations Development Decade:
mid-term review and appraisal
- 1976** Energy and agriculture
- 1977** The state of natural resources and the human environment for food and agriculture
- 1978** Problems and strategies in developing regions
- 1979** Forestry and rural development

- 1980 Marine fisheries in the new era of national jurisdiction
- 1981 Rural poverty in developing countries and means of poverty alleviation
- 1982 Livestock production: a world perspective
- 1983 Women in developing agriculture
- 1984 Urbanization, agriculture and food systems
- 1985 Energy use in agricultural production
Environmental trends in food and agriculture
Agricultural marketing and development
- 1986 Financing agricultural development
- 1987–88 Changing priorities for agricultural science and technology in developing countries
- 1989 Sustainable development and natural resource management
- 1990 Structural adjustment and agriculture
- 1991 Agricultural policies and issues: lessons from the 1980s and prospects for the 1990s
- 1992 Marine fisheries and the law of the sea: a decade of change
- 1993 Water policies and agriculture
- 1994 Forest development and policy dilemmas
- 1995 Agricultural trade: entering a new era?
- 1996 Food security: some macroeconomic dimensions
- 1997 The agroprocessing industry and economic development
- 1998 Rural non-farm income in developing countries
- 2000 World food and agriculture: lessons from the past 50 years
- 2001 Economic impacts of transboundary plant pests and animal diseases
- 2002 Agriculture and global public goods ten years after the Earth Summit
- 2003–04 Agricultural biotechnology: meeting the needs of the poor?
- 2005 Agriculture trade and poverty: can trade work for the poor?

THE STATE OF FOOD AND AGRICULTURE

2006

The State of Food and Agriculture 2006 examines the issues and controversies surrounding international food aid and seeks to find ways to preserve its essential humanitarian role while minimizing the possibility of harmful secondary impacts. Food aid has rightly been credited with saving millions of lives; indeed, it is often the only thing standing between vulnerable people and death. Yet food aid is sharply criticized as a donor-driven response that creates dependency on the part of recipients and undermines local agricultural producers and traders upon whom sustainable food security depends. The economic evidence regarding these issues is surprisingly thin, but it confirms that the timing and targeting of food aid are central to achieving immediate food security objectives while minimizing the potential for harm. Reforms to the international food aid system are necessary but they should be undertaken carefully because lives are at risk.

Included in this issue is a mini CD-ROM of the FAO Statistical Yearbook 2005–2006 Vol. 2/1, containing time series data for 200 countries in Arabic, Chinese, English, French and Spanish.
