ECO-AUDIT

*Environmental Benefits Statement*

The World Bank is committed to preserving endangered forests and natural resources. The Office of the Publisher has chosen to print *Gender in Agriculture Sourcebook* on recycled paper with 30 percent post-consumer waste, in accordance with the recommended standards for paper usage set by the Green Press Initiative, a nonprofit program supporting publishers in using fiber that is not sourced from endangered forests. For more information, visit [www.greenpressinitiative.org](http://www.greenpressinitiative.org).

Saved:

- 57 trees
- 40 million BTUs of total energy
- 5,042 lbs. of CO<sub>2</sub> equivalent of greenhouse gases
- 20,928 gallons of wastewater
- 2,687 lb. of solid waste

The *Gender in Agriculture Sourcebook* provides an up-to-date understanding of gender issues and a rich compilation of compelling evidence of good practices and lessons learned to guide practitioners in integrating gender dimensions into agricultural projects and programs. The *Sourcebook* is a joint product of the World Bank, Food and Agriculture Organization (FAO) of the United Nations, and International Fund for Agricultural Development (IFAD), and contributions from more than 100 writers and reviewers.

“The *Gender in Agriculture Sourcebook* is a timely and extremely important document as the criticality of increased agricultural investment is never more as clear as today with the potential crisis facing the world’s poor with soaring food prices.”

*Nata Duvvury, former Director of Gender, Violence and Rights, International Center for Research on Women (ICRW)*

“The *Sourcebook* authors have integrated gender issues in meaningful ways into specific sectors within agriculture.”

*Mary Hill Rojas, former Senior Manager of the Women in Development Project Management Unit, Chemonics International*

“This book is an important step towards revitalizing attention to gender equality in the agricultural sector. This *Sourcebook* is a new compilation of ideas and examples that will guide practitioners in ensuring that new attention to agriculture is infused with up-to-date knowledge on gender issues.”

*Deborah Rubin, Director, Cultural Practice*

“This is a very important contribution. I hope that it is widely read by all involved in land tenure policy (not just those who are interested in gender). There is sound analysis and advice on how to ensure that land administration programs can strengthen women’s property rights.”

*Ruth Meizen-Dick, Senior Research Fellow, International Food Policy and Research Institute (IFPRI)*

Enabling poor rural people  
to overcome poverty
