

Cross-Sectoral Policy Coordination

FAO / Forestry Policy Workshop

Czech Republic, Turnov – Hruba Skala March 21st – 26th, 2004

Franz Schmithüsen

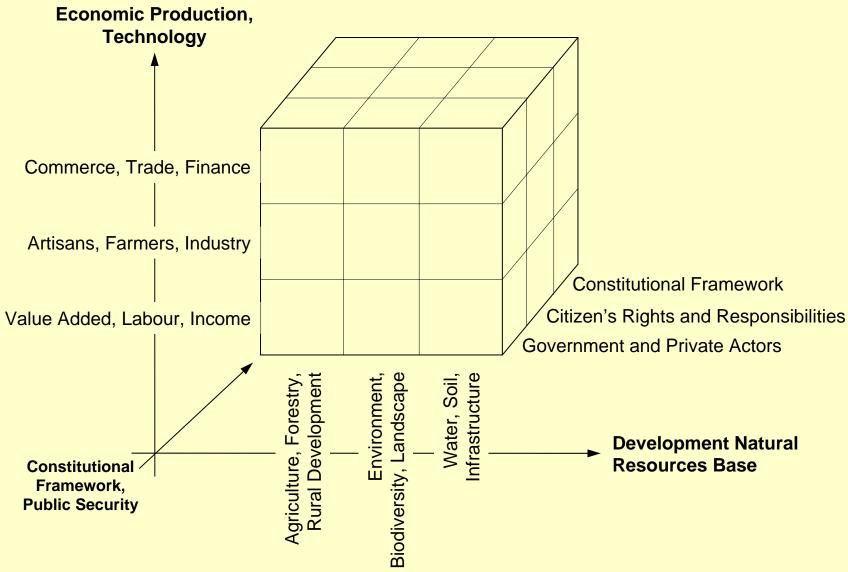

Forest Policy and Forest Economy
Institute for Human Environment Systems (HES)
Department of Environmental Sciences
Swiss Federal Institute of Technology *ETH Zurich* / Switzerland

Overview

- Maintaining the Natural Resource Base
- Linkages between Forest and other Public Policies
- Multi-Level Public Policy Networks
- Role of Forest Owners and Forest Users
- Financing Multiple Uses in Sustainable Land Management
- Critical Issues to be Addressed

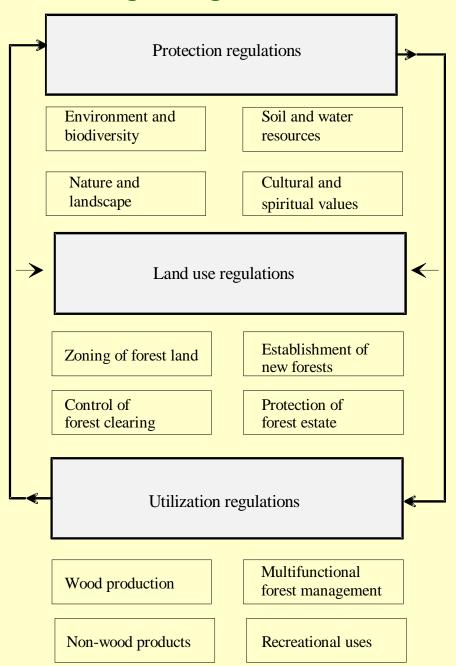

Policy and Law Networks for Maintaining the Natural Resources Base

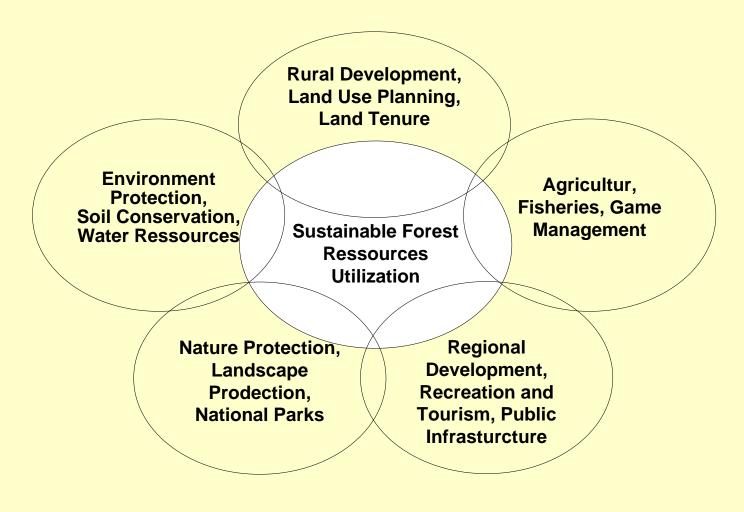

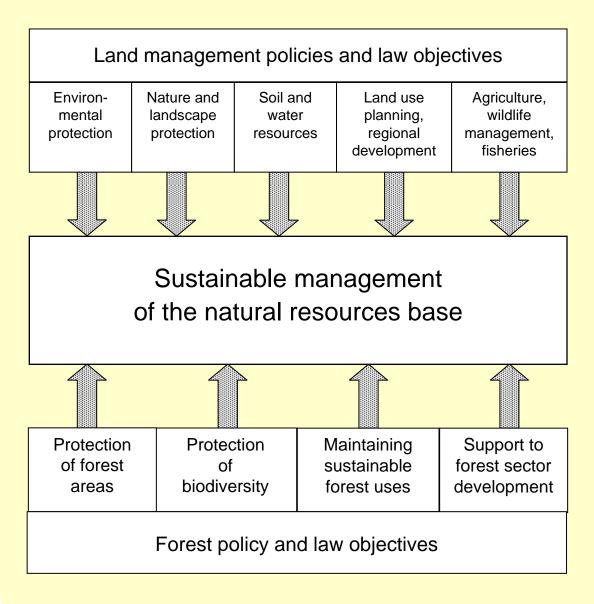

Forest Policies and Laws Regulating Protection, Land Use and Utilisation

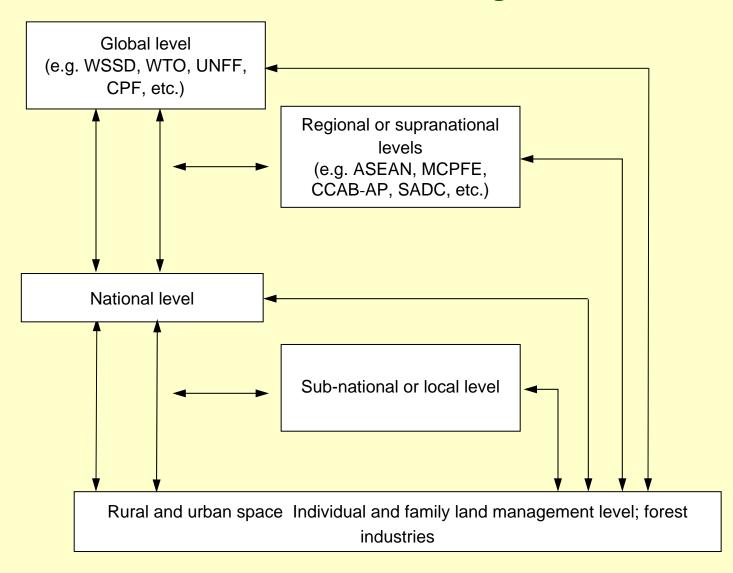

Public Policy and Legislation with Impacts on Sustainable Forest Management

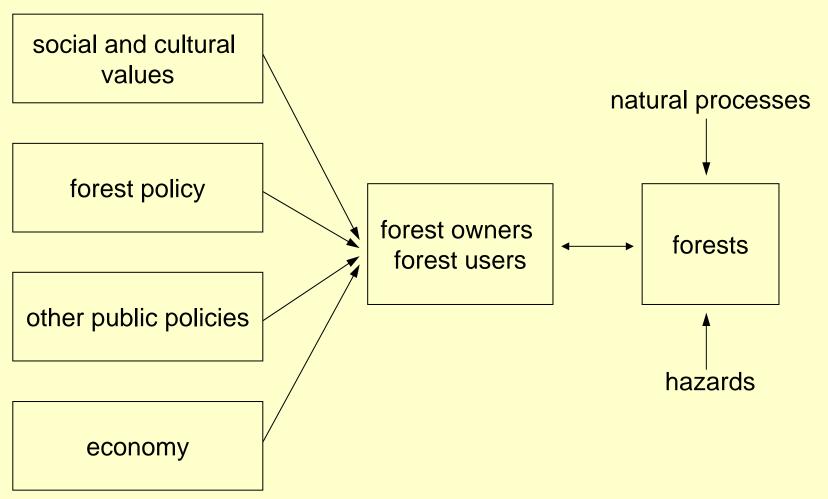

Policy and Legal Network Addressing natural Resources Development

Multi-Level Public Decision-Making towards Sustainable Land Management

Framework Explaining Behaviour of Forest Owners and Users

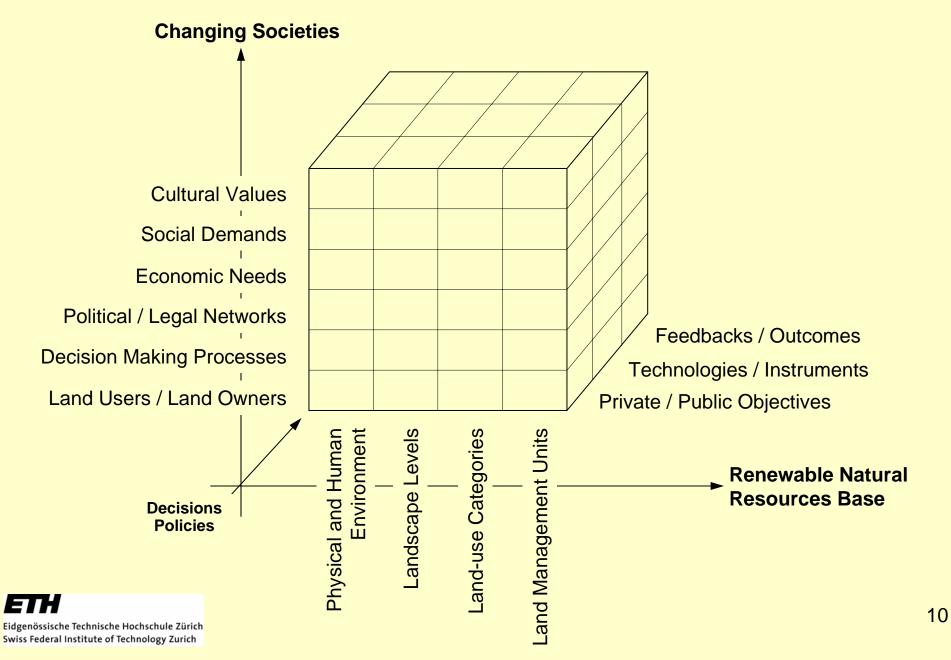

Source: Schmithüsen, Bisang and Zimmermann, 2001: 43 (modified)

Private and Public Financial Resources

- Investments from the Landowners
- Proceeds from Market Sales of Goods and Services:
- Payments from Private User Groups
- Compensations from Local Public Entities
- Government Incentives and Compensations
- Supranational and International Proceeds

Human Environment Systems Interactions in Land Management at Ecosystem, Landscape and Ecosphere Level

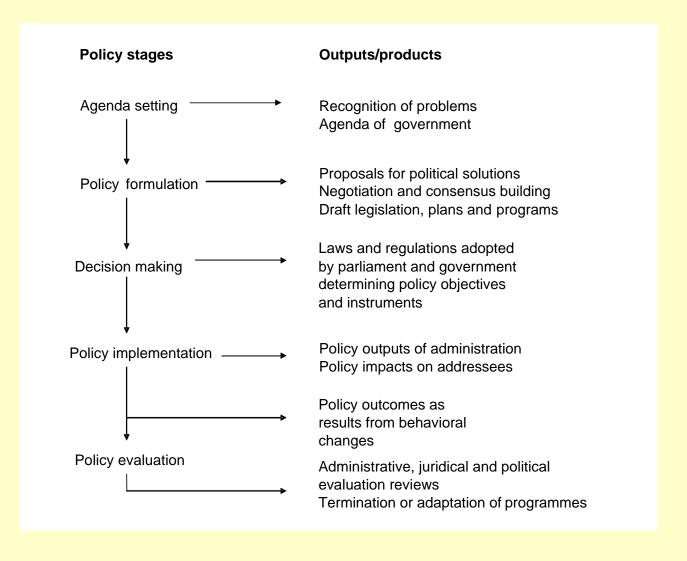

Critical Issues to be Addressed

- Which Policies are Relevant and Need Coordination?
- What are the Positive Linkages to be Strengthened?
- What are the Negative Effects to be Avoided?
- What are the Stakeholders and Public Administrations Involved?
- What kind of Co-ordination is needed?
- At what Level of Government must the Problem be Resolved?
- What are the Political Options?

Co-ordination at Different Stages of the Policy Cycle

Instruments for Policy Co-ordination in Land Management 1

Consensus Building Instruments

- Stakeholder Consensus and Participation
- Consensus between Public and Private Sectors
- Political Consensus at National, Regional and Local Levels

Information Instruments and Research

- Identification of Positive and Negative Policy Linkages
- Identification of short and long term consequences
- Elaboration of Workable Solutions and Compromises
- Evaluation of Success and Policy Failures

Instruments for Policy Co-ordination in Land Management 2

Planning Instruments

- Planning Systems in Accordance with Local Needs
- Regional and National Forest and Land Management Programs
- Planning with Regard to Policy and Legal Changes
- Financial Planning of Private and Public Outputs

Political Process Steering Instruments

- Public Hearings, Mediation and Transparency of Decisions
- Determination of Competencies of Public Administrations
- Co-operative Systems and Communications Processes
- Current Information to Media and to the Public
- Joint Governmental Land Management Programs

Private and Public Investment for Multiple Goods and Services in Sustainable Land Management

Investment and contributions from landowners					
Owners' uses and consumption		Owr	Owners' interests and values		
Proceeds from market sales					
Production of marketable products	Commercial operations and services			Tarketable infrastructure services	
Proceeds from contributions and compensation of third parties					
Individual users	Private user groups			Public local entities	
Proceeds from incentives of national governments and sub-national authorities					
Compensation for outputs and services delivered as public requirements			Incentives for outputs and services made available in the public interest		
Proceeds from supranational and international institutions and organizations					
Productive resources investments		Sustainable land management practices		Protection and non-use arrangements
