CX 4/40.2

CL 2010/55 - PR
décembre 2010

DESTINATAIRE:	Intermédiaire du Codex Organisations internationales intéressées
EXPEDITEUR:	Secrétariat, Commission du Codex Alimentarius, Programme mixte FAO/OMS sur les normes alimentaires FAO, Viale delle Terme di Caracalla, 00153 Rome, Italie
OBJET :	DEMANDE DE COMMENTAIRES SUR LES RECOMMANDATIONS DE LA RÉUNION MIXTE FAO/OMS SUR LES RÉSIDUS DE PESTICIDES (JMPR) [1] ET LES LMR POUR LES PESTICIDES À L'ÉTAPE 3 DE LA PROCÉDURE
DATE LIMITE :	1er mars 2011

COMMENTAIRES :

CONTEXTE

A. LMR A L'ÉTAPE 3 DE LA PROCÉDURE

1. La réunion mixte annuelle de la FAO /OMS sur les résidus de pesticides (JMPR) s'est tenue à Rome, Italie, du 21 au 30 septembre 2010.Les résumés suivants des résultats de la réunion annuelle de la JMPR sont fournis et rendus accessibles à une date précoce aux parties intéressées.

2. La réunion a évalué 23 pesticides, dont 8 étaient de nouveaux composés et 5 étaient des réévaluation dans le cadre du programme de révision périodique du Comité Codex sur les résidus de pesticides (CCPR). La réunion a établit des doses journalières admissibles (DJA) ainsi que des doses de référence aigües (DrfA).

3. La réunion a estimé des niveaux maxima de résidus, qu'elle a recommandés pour être utilisés comme limites maximales de résidus (LMR) par le CCPR. Elle a aussi évalué des médianes de résidus en essais contrôlés(MREC) et les plus hauts niveaux de résidus (HR) comme base pour l'estimation des doses journalières de résidus des pesticides révisés. L'application des niveaux HR est expliquée dans le rapport de la réunion de 1999 (section 2.4). Les attributions et estimations sont reprises au tableau.

4. Les pesticides pour lesquels les doses journalières estimées peuvent, sur base des informations disponibles, dépasser la DJA sont indiquées avec des notes de bas de page en détail dans le rapport de la réunion 1999 (section 2.2.). Les notes de bas de page s'appliquent aussi aux produits spécifiques lorsque les informations disponibles indiquent que la DrfA d'un pesticide risque d'être dépassée lorsque le produit est consommé. Il faut noter que toutes ces distinctions s'appliquent uniquement aux nouveaux composés et aux composés réévalués dans le cadre du programme de révision périodique du CCPR.

5. Dans le tableau sont indiqués les numéros de référence Codex des composés et les numéros de la classification Codex (NCC) des produits, pour faciliter la référence aux LMR Codex pour les résidus de pesticides (*Codex Alimentarius*, Vol. 2B) et d'autres documents et documents de travail de la Commission du Codex Alimentarius. À la fois les composés et les produits sont listés par ordre alphabétique.

6. Outre les abréviations reprises ci-dessus, les qualifications suivantes sont utilisées dans le tableau.

[1] Les recommandations de la JMPR pour les limites maximales de résidus correspondent à l'étape 3 de la procédure du Codex.

* (après le nom du pesticide)	Nouveau composé
** (après le nom du pesticide)	Composé révisé dans le cadre du programme de révision périodique du CCPR
* (après la LMR recommandée)	A la limite de quantification ou à la limite approximative de quantification
HR-P	Plus haute valeur dans un produit transformé, en mg/kg en multipliant le HR dans le produit frais par le facteur de transformation
Po	La recommandations intègre le traitement après récolte du produit
PoP (après recommandation pour les aliments transformés (classes D et E de la classification Codex)	La recommandation intègre le traitement après récolte dans le produit alimentaire primaire.
MREC-P	Une MREC pour un produit transformé calculée en appliquant à la MREC calculée pour le produit frais agricole, le facteur de concentration ou de réduction pour la transformation.
W (au lieu de la LMR recommandée)	La recommandation précédente est retirée, ou retrait de la LMR recommandée ou existante du Codex ou un avant-projet de LMR est recommandé.

DEMANDE DE COMMENTAIRES

9. Les gouvernements membres et organisations internationales intéressés désireux de soumettre des commentaires sur les avant-projets de LMR nouvellement proposés correspondant à l'étape 3 de la procédure Codex comme proposés par la JMPR 2010 ainsi que sur d'autres recommandations pertinentes pour le travail de la 43ème session du Comité Codex sur les Résidus de Pesticides (voir tableau ci-dessous) sont priés de le faire par écrit, conformément aux procédures pour l'élaboration des Normes Codex et textes connexes (*Manuel de procédure du Codex Alimentarius*), de préférence par courriel, aux adresses indiquées en page de couverture et ce avant le 1er mars 2011.

B. LMR A L'ÉTAPE 6 DE LA PROCÉDURE

10. La 33ème session de la Commission a adopté à l'étape 5 les avant-projets de LMR tels que proposés à l'Annexe IV de ALINORM 0/33/24 et les a avancés à l'étape 6, (voir ALINORM 10/33/REP, par. 69 et Annexe IV) qui ont été mis au point par la 42ème session du CCPR, tout en prenant note des réserves émises par la Communauté européenne et la Norvège sur les LMR pour fluopicolide (235) et haloxyfop (194)

11. Par ailleurs, la 42ème session du CCPR a renvoyé à l'étape 6 quelques projets de LMR tels que présentés à l'Annexe VII de ALINORM 10/33/24 pour de nouveaux commentaires et examen lors de sa prochaine session (voir ALINORM 10/33/24, par. 36, 50 et 54).

12. Ces documents ont été précédemment diffusés aux intermédiaires du Codex et sont disponibles sur les sites Internet suivants : http://www.codexalimentarius.net sous Rapports, réunions et événements.

13. Les gouvernements et organisations internationales intéressés désireux de soumettre des commentaires sur les projets de LMR à l'étape 6 de la procédure Codex sont priés de la faire par écrit conformément aux procédures pour l'élaboration de normes Codex et textes connexes (*Manuel de procédure du Codex Alimentarius*), de préférence par courriel, aux adresses indiquées en page de couverture et ce avant le 1er mars 2011.

	CM 0654	Wheat bran, unprocessed	2 PoP	2 PoP	0.79 PoP	1.26 PoP
	CF 1211	Wheat flour	W f	0.2 PoP		
	CF 1210	Wheat germ	1 Po		0.45 PoP	0.72 PoP
	AS 0654	Wheat straw and fodder, dry	W	0.5		
	CF 1212	Wheat wholemeal	W f	0.5 PoP		

Definition of the residue (for compliance with the MRL for plant and animal commodities and for estimation of dietary intake for plant and animal commodities): bifenthrin (sum of isomers).

The residue is fat-soluble.

a The recommendations for cattle kidney and cattle liver are withdrawn, to be replaced by a recommendation for mammalian edible offal. Recommendations for cattle fat, meat and cattle milk are withdrawn and replaced by recommendations for mammalian meat and milks.

b The recommendations for grapefruit, lemon and orange, sweet are withdrawn to be replaced by recommendation for citrus fruits.

c The recommendations for mango, okra and papaya are based on reported use conditions provided appropriate protection of the crop, but were not supported by official information on uses.

d The recommendation for potato is withdrawn to be replaced by recommendation for root and tuber vegetables.

e For strawberry, the ARfD is exceeded. No alternative GAP is available.

f The recommendations for maximum residue levels for wheat flour and whole meal are withdrawn, because they are covered by the recommendation for wheat.

Pesticide (Codex reference number)	CCN	Commodity	Recommended MRL mg/kg		STMR or STMR-P mg/kg	HR or HR-P mg/kg
			New	Previous
