## JOINT FAO/WHO FOOD STANDARDS PROGRAMME

### CODEX COMMITTEE ON PESTICIDE RESIDUES

**Forty second Session**

**Xian, China, 19 - 24 April 2010**

### **DRAFT AND PROPOSED DRAFT MAXIMUM RESIDUE LIMITS IN FOODS AND FEEDS AT STEPS 7 AND 4**

This document contains the following:

#### **Explanatory Notes**

**Table 1** List of Pesticides Whose Maximum Residue Limits or Guidelines Levels Have Been Withdrawn by the Codex Alimentarius Commission and for Which No MRLs Have Been Proposed

#### **Indices of Pesticides**

**Part 1** List of Maximum Residue Limits for Pesticides in Food and Animal Feeds (at various Steps of the Codex Procedure)

**Part 2** List of Extraneous Maximum Residue Limits for Pesticides in Food and Animal Feeds (at various Steps of the Codex Procedure)

**Part 3** List of Pesticides for Which Guideline Levels Have Been Set

**ANNEX I** MRL Periodic Review Procedure

## EXPLANATORY NOTES

### 1. DATES OF ESTIMATION OF ACCEPTABLE DAILY INTAKES (ADIs), TEMPORARY ACCEPTABLE DAILY INTAKES (TADIs), PROVISIONAL TOLERABLE DAILY INTAKES (PTDIs) AND ACUTE REFERENCE DOSES (ACUTE RfD)

ADIs/PTDIs/Acute RfD The Year of estimation or confirmation is shown in parentheses.

TADIs The period from the year of estimation or most recent extension to the year by which data needed for the estimation of a full ADI are required is shown in parentheses.

### 2. QUALIFICATION OF MRLS

- (\*) (following MRLs) : At or about the limit of quantification.
- E** (following MRLs) : The MRL based on extraneous residues.
- EMRL** (as heading) : Extraneous Maximum Residue Limit.
- F** (following MRLs for milk) : The residue is fat soluble and MRLs for milk and milk products are derived as explained in the introductions to Volume 2 of the *Codex Alimentarius*.
- 2004 JMPR decided that, for fat-soluble pesticides, two maximum residue levels will be estimated, if data permit: one for whole milk and one for milk fat. For enforcement purposes, a comparison can be made either of the residue in milk fat with the MRL for milk (fat) or of the residue in whole milk with the MRL for milk (for details see: Report of the JMPR 2004, "2.7 Revisited: MRLs for fat-soluble pesticides in milk and milk products", pages 24-25).
- (fat)** (following MRLs for meat) : The MRL applies to the fat of the meat.
- GL** (as heading) : Guideline Level. GLs are elaborated by the CCPR up to Step 4 of the Procedure and held there pending "acceptable daily intakes" or "temporary acceptable intakes" being estimated for the pesticides in question by the JMPR. **GLs do not represent Codex recommendations.**
- Po** (following (T) MRLs) : The MRL accommodates post-harvest treatment of the commodity.
- PoP** (following (T)MRLs for processed foods (Classes D and E in the Classification)) : The MRL accommodates post-harvest treatment of the primary food commodity.
- T** (following MRL) : The MRL is temporary, irrespective of the status of the ADI, until required information has been provided and evaluated.
- TMRL** (as heading) : All MRLs are temporary because the ADI is temporary.

### 3. STEP NUMBERS

- CXL-D** : The CCPR decided to recommend to the Codex Alimentarius Commission to delete the CXL, pending decision by the Commission.
- 5/8** : The draft MRL is submitted to the CAC simultaneously at Steps 5 and 8 because the CCPR has recommended the omission of, or has already carried out, Steps 6 and 7.
- (a) (following Step number) : The MRL is a proposed amendment to a CXL.

### 4. REFERENCES

References are normally given only for those MRLs which are due for further discussion within the CCPR. They are therefore given only exceptionally for MRLs which are CXLs or are at Step 8, 7A, or 5/8. References are indicated in the example shown below:

Commodity	(T)MRL	Step	References
No	Name (mg/kg)	JMPR	CCPR
(1)	(1)	69, 70 (2) (3)	20.131: 21.172 (4) (5)

- (1) : Code Number and Name of Commodity - Reference to the Codex Classification of Foods and Animal Feeds (*Codex Alimentarius* Volume 2, Second Edition, Section 2).
- (2) : Year in which limit was first estimated. Note that it is not necessarily the year when the (T) MRL was first recommended, because the limit may have been recorded originally as a Guideline Level and converted to a (T) MRL when a (T) ADI was estimated.
- (3) : Year(s) of subsequent review(s) (of new or original data or both) unless the review resulted in a revised estimate.
- (4) : No of Session of CCPR at which recommendation was discussed. The document numbers of the relevant reports are listed below.
- (5) : No of paragraph in CCPR report.

### 5. JMPR EVALUATIONS

- T : Toxicological Evaluation
- R : Residue Evaluation
- only year : Both toxicological and residue evaluations
- after year : Periodic Review
- brackets : Tentative year for JMPR evaluation

JMPR: 75R, 76R, 77R, 78R, 86, 87R, 88R, 89, 90R, 91R, 01', 04R

ADI: 0.02 mg/kg body weight (2001)

Acute RfD: 0.02 mg/kg body weight (2001)

Residue: For compliance with MRLs and for estimation of dietary intake for plant and animal commodities: sum of methomyl and thiodicarb, expressed as methomyl. MRLs related to methomyl and (154) thiodicarb are combined into a single list.

Note: Previous ADI, 0.03 mg/kg bw (1989). 36th CCPR decided to return draft MRLs for apple and pear to Step 6 because of acute intake concerns (122) and to consider revocation of the CXLs for sweet corn and tomato at its 37th session because of acute intake concerns (125). Residue definition changed in 2004. The Committee noted that there were acute intake concerns identified by JMPR for many commodities and decided to return draft MRLs for apple; brassica vegetables; celery; fruiting vegetables; cucurbits; grapes; leafy vegetables and pears to Step 6. The Committee decided to request JMPR to consider using alternative GAPs to recommend lower MRLs for these commodities and to possibly replace the group MRL for cucurbits with individual cucurbits (38-80,81). The Committee decided to maintain the proposed draft MRLs for Brassica vegetables, celery, fruiting vegetables, cucurbits, grapes and leafy vegetables at Step 7 awaiting the outcome of the 2008 JMPR evaluation

Main Uses: Insecticide

JMPR: 79, 80R, 81, 82R, 83R, 84R, 85R, 86, 87T, 88R, 89R, 91R, 99T'

ADI: 0.05 mg/kg body weight (1987; confirmed 1999)

Acute RfD: Unnecessary (JMPR 1999)

Residue: Permethrin (sum of isomers) (fat-soluble). ADI applies to technical grade permethrin with cis:trans ratios of 25:75 to 40:60.

Note: Permethrin was reviewed by the 54th JECFA (February 2000) but as a different formulation (cis:trans ration of 80:20) was used for veterinary applications, it did not make any proposals on ADI or MRLs.

**203 Spinozad**

Main Uses: Insecticide

JMPR: 01, 04R

ADI: 0-0.02 mg/kg body weight (2001)

Acute RfD: Unnecessary (JMPR 2001)

Residue: For compliance with MRLs and for estimation of dietary intake for plant and animal commodities: sum of spinosyn A and spinosyn D. The residue is fat-soluble, but residues in milk should be determined in the whole milk. Residues in milk should be measured on the whole milk.

Note: The recommendations are derived from a dairy cow feeding study and the corresponding animal dietary burden. They are extended to 'Edible offal (Mammalian) [except cattle]' and 'Meat (from mammals other than marine mammals) [except cattle]' following the policy of the 2002 JMPR. The proposed MRLs for cattle meat (3 mg/kg, fat), cattle kidney (1 mg/kg) and cattle liver (2mg/kg), arising from the direct use of spinozad on cattle, should remain. They exceed the recommendations for mammalian meat and offal, and so require the restriction 'except cattle' to the general commodity descriptions.

**209 Methoxyfenozide**

Main Uses: Insecticide

JMPR: 03, 06R

ADI: 0-0.1 mg/kg body weight (2003, confirmed 2006)

Acute RfD: 0.9 mg/kg body weight (2009)

Residue: For compliance with the MRL and for estimation of dietary intake) for plant and animal commodities: methoxyfenozide. The residue is fat-soluble, but is not classed as fat-soluble with respect to its distribution in milk.

Note: 1. No residues are expected in animal commodities from consumption of feed commodities with cyprodinil residues as evaluated by JMPR. 2. The information provided to the JMPR precludes an estimation that the dietary intake would be below the acute intake RfD for children.

**212 Metalaxyl-M**

Main Uses: Fungicide

JMPR: 04

ADI: 0-0.08 mg/kg body weight (2004) for metalaxyl-M + metalaxyl

Acute RfD: Unnecessary (JMPR 2004)

Residue: Residue (of metalaxyl including metalaxyl-M) for compliance with MRLs and estimation of dietary intake in plant commodities: metalaxyl. Residue (of metalaxyl including metalaxyl-M) for compliance with MRLs and estimation of dietary intake in animal commodities: sum of metalaxyl and metabolites containing the 2,6-dimethylaniline moiety, expressed as metalaxyl.

Note: JMPR 2004: No new MRLs are recommended because all MRLs required for metalaxyl-M are covered by existing MRLs for Metalaxyl. The values listed in the "New" column (see JMPR 2004) are the estimated maximum residue levels for metalaxyl-M and, because they do not exceed the existing metalaxyl MRLs, are not intended to replace them. Metalaxyl is a racemic mixture of (R)- and (S)-enantiomers. Metalaxyl-M is the (R)-enantiomer. No MRLs are currently recommended for animal commodities. The Committee decided to return all draft MRLs to Step 6 and to consider revocation of all CXLs for metalaxyl in two years time (38-130). The Committee decided to return all MRLs to Step 6 awaiting phasing out of metalaxyl (138) and to request information on support for metalaxyl CXLs. The Delegation of Thailand informed the Committee that metalaxyl was used in Thailand and that the phase-out of metalaxyl would cause trade problems (39-126).

The Committee agreed to retain all the draft MRLs at Step 7, awaiting the periodic review by JMPR for both toxicology and residues in 2013. (41-122)

**216 Indoxacarb**

Main Uses: Insecticide

JMPR: 05, 07R

ADI: 0-0.01 mg/kg body weight The ADI and ARfD applies to indoxacarb (S-enantiomer) and its R-enantiomer ( 2005).

Acute RfD: 0.1 mg/kg body weight (2009)

Residue: For compliance with the MRL for all commodities and for estimation of dietary intake for plant commodities: sum of indoxacarb and its R enantiomer.

For estimation of dietary intake for animal commodities: sum of indoxacarb, its R enantiomer and methyl 7-chloro-2,5-dihydro-2-[[4-(trifluoromethoxy)phenyl] amino]carbonyl]indeno[1,2-e][1,3,4]oxadiazine-4a(3H)-carboxylate, expressed as indoxacarb.

The residue is fat-soluble.

Note: Indoxacarb is a fat-soluble compound. Previously, the milk MRL would have been marked with an "F" to indicate a procedure for calculating "MRLs" for processed dairy products. Currently, indoxacarb MRLs for milk and milk fat are available to support "MRLs" for processed dairy products (2005).

The CCPR also decided not to request a new evaluation of the monitoring data by the next meeting of JMPR.(33.195) The CAC-24 decided to retain the current temporary EMRL of 5 mg/kg and agreed that the proposal to lower the EMRL to 1 mg/kg should be referred to the CCPR for further consideration (ALINORM 01/41, para. 145)

**ANNEX I****MRL PERIODIC REVIEW PROCEDURE**

The periodic Review Procedure consists of two distinct phases as described below:

**PHASE I****IDENTIFY PERIODIC REVIEW CHEMICALS AND SOLICIT DATA COMMITMENTS****(Year 1, CCPR Meeting)****1. Identify Candidate Chemicals for Re-evaluation**

On an annual basis the CCPR (Working Group on Priorities) lists chemicals meeting the following criteria:

- pesticide chemicals for which MRLs were first estimated more than 10 years ago; or
- pesticide chemicals for which a periodic review was conducted more than 10 years ago.

Tentative lists for several years may be prepared when feasible.

**2. Notify Data Owners or Other Parties of Candidate List**

Governments and international organizations represented at the annual CCPR Meeting expeditiously notify current data owners (or other interested parties) of the candidate list for periodic reviews, and when available, tentative lists for the following years. A copy of the most recent procedure for periodic review is also included.

**3. Invite Commitment to Support Continued (or New) Codex Maximum Residue Limits (CXLs)**

With their notification to data owners (or other interested parties) on the candidacy of chemicals for periodic review, governments and international organizations inquire of these parties their willingness to provide data for that review and as well as to advise them of the implications if they choose not to.

The invitation for a commitment will request a written response within six months to be provided to:

- Chairman, CCPR
- Chairman, Priorities Working Group
- JMPR Secretariats
- the requester (government or international organization representative) (Namees, titles and addresses will be provided).

The invitation will request that the following information be provided in the response:

- a. A list of all commodities for which interested parties are willing to support CXLs.
- b. A brief summary of all current Good Agricultural Practice (GAP) which they are willing to provide and which is pertinent to residue data they are willing to provide (e.g. commodities and countries for with detailed GAP summaries and representative labels can be provided).
- c. A list of all chemistry (residue, metabolism, animal transfer, processing, analytical sample storage stability, analytical methods etc.) and toxicology studies and other data that they are willing to provide (regardless of whether previously provided) and the data they commit to make complete data package submissions to the JMPR. Comments on the status of registrations for the chemicals at the national level are encouraged. Data for which a submission is committed should be identified in the response by study or report title and number, author, date.

**4. Repeat the Notification and Invitation**

By means of a Codex Circular Letter to accompany the report of the Meeting the Secretariat will repeat the notification and request. On receipt of the request by the Circular Letter, governments and international organizations will immediately repeat their notification and invitation to identified interested parties who may not have been represented at the CCPR (they would not have received the report of the Meeting and the accompanying Circular Letter). Interested parties need only respond to one of the request, but should copy addresses listed in item 3 above.

## **PHASE II**

### **STATUS REPORT ON DATA COMMITMENTS AND CCPR FOLLOW-UP**

#### **(Year 2, CCPR Meeting)**

**1. Status Report on Data Commitments** - The Priorities Working Group will provide a report and room document to the CCPR on the status of commitments received to provide data for each compound identified in year 1. This information will be used to schedule JMPR reviews or to make other recommendations such as withdrawal of CXLs.

#### **2. Response to Data Commitments**

a. If there is no commitment – to provide and identify or develop data to support current CXLs, the CXL(s) will be recommended by the CCPR for withdrawal by the next session of the Codex Alimentarius Commission.

b. If a commitment is made – to provide and identify or develop data to support current CXLs, the MRL(s) are scheduled for JMPR review. The JMPR review will result in one of the following scenarios:

- Sufficient data are submitted to confirm the CXL and it remains in place.
- Sufficient data are submitted to support a new proposed MRL, it enters the process at Step 3 and the existing CXL is deleted automatically after no more than 4 years.

Insufficient data have been submitted to support a new MRL or to confirm the existing CXL, data submitters are so advised by written notification from the FAO Joint Secretary and/or by issuance of the JMPR Report.

On being advised of the data inadequacy, data submitters may be the next CCPR Meeting, provide to the FAO and the CCPR Secretaries a written commitment to generate and submit a complete dossier of required data for review within 4 years. The CXL is maintained for no more than 4 years following advice of data inadequacy (by direct notification or by issuance of the JMPR Report). The 4 year period may be extended by the CCPR only to the extent necessary for the JMPR to schedule and complete review of the available new data. The new data are scheduled for the second JMPR review and the first part of the PHASE II 2b procedure is repeated:

- Sufficient data are submitted to confirm the CXL and it remains in place.
  - Sufficient data are submitted to support a new proposed MRL, it enters the process at Step 3. The CXL is automatically deleted no more than the 4 years after the new proposal enters the process.
  - Insufficient data are submitted to confirm the CXL or support a proposed MRL the CCPR recommends deletion of the CXL.
- c. If the committed data are not submitted, or if the data submitted for the initial periodic review are insufficient and no commitment is made by the next CCPR Meeting to generate new data, the CCPR recommends deletion of the CXL.

## SUMMARY OF PERIODIC REVIEW PROCEDURE FOR CODEX MRLS
