Agenda Item 7(a)

CX/PR 22/53/6

May 2022

JOINT FAO/WHO FOOD STANDARDS PROGRAMME

CODEX COMMITTEE ON PESTICIDE RESIDUES

53rd Session

(Virtual)

4-8 July and 13 July 2022

REVISION OF THE CLASSIFICATION OF FOOD AND FEED: ESTABLISHMENT OF MAXIMUM RESIDUE LIMITS FOR PESTICIDES FOR OKRA

(Prepared by the Electronic Working Group chaired by the United States of America
and co-chaired by the Netherlands)

Codex members and observers wishing to submit comments on this document
should do so as instructed in CL 2022/34-PR available on the Codex webpage¹

BACKGROUND

1. Background on the discussion of the revision of the *Classification of Food and Feed* (CXM 4-1989) can be found in the reports of the 36th – 52st sessions of the Codex Committee on Pesticide Residues (CCPR) including relevant sessions of the Codex Alimentarius Commission (CAC) held from 2004 to 2021.²
2. The practice adopted by CCPR in the revision of the Classification is to retain the revision of the commodity groups (e.g. fruit commodity groups, vegetable commodity groups, etc.) waiting for the final compilation of the related commodity groups and the corresponding tables on examples of representative commodities for inclusion in the *Classification of Food and Feed* and the *Principles and Guidance on the Selection of Representative Commodities for the Extrapolation of Maximum Residue Limits for Pesticides to Commodity Groups* (CXG 84-2012) respectively.³
3. CCPR52 (2021) recalled its previous discussion⁴ on extrapolation of maximum residue limits (MRLs) for okra⁵, martynia and roselle and the feedback from JMPR concerning the difficulties to extrapolate MRLs for this commodity from the Subgroup Pepper and pepper-like commodities, and agreed that the EWG on the revision of the Classification should consider representative commodities from which MRLs for okra could be extrapolated. Recalling the decision of CCPR51 (2019) that monitoring data on residues of pesticides in okra should be submitted, CCPR52 agreed that the Electronic Working Group (EWG) should take into account this monitoring data when considering this matter. Delegations expressed the importance to resolve this matter as okra is an important commodity for their countries and it would be difficult to establish single MRLs for this commodity.

⁵ JMPR, 2019 Regular Meeting, Section 3 - Responses to specific concerns raised by CCPR, Section 3.9 - *Request from CCPR concerning okra* available at: <https://www.fao.org/agriculture/crops/thematic-sitemap/theme/pests/jmpr/jmpr-rep/en/>

4. CCPR52 agreed to re-establish the EWG on the revision of the Classification, chaired by the United States of America (USA) and co-chaired by The Netherlands and to consider the issue of okra and an appropriate representative commodity taking into account monitoring data submitted⁶.
5. The EWG considered the issue of okra and an appropriate representative commodity taking into account submitted monitoring data from Canada and India as presented in Appendix II.
- 5.1 Australia noted the difficulty in drawing conclusions from monitoring data (okra from the USA) and lack of a comparison to tomato and pepper and lack of GAP.
- 5.2 Citing previous 2008-2017 monitoring data, Canada noted only 5 cases where residues detected in okra were greater than both residues in chili (non-bell) pepper and tomato and only 2 cases where residues detected in okra were greater than residues in chili (non-bell) pepper. In these cases, residues found in okra were all below established chili (non-bell) tolerances (MRLs). In updated Canadian monitoring data (2017-2018, Appendix II), only one sample had a residue higher than the Codex MRL for the representative commodity, and this value is significantly lower than the US tolerance of 5 ppm for chili pepper (non-bell) pepper. Canada also noted that in monitoring data from India that only 40 out of 1075 okra samples in the Indian monitoring data had a residue value higher than the Codex MRL for the representative commodity (Appendix II). Canada recommended that chili (non-bell) pepper be the representative commodity for okra, noting that there is sufficient conservatism in the MRL derived using the OECD MRL calculator to be protective of actual residues observed in okra.
- 5.3 Germany in its initial post noted the difficulty in drawing a conclusion in not knowing the GAP behind the okra residue data. In a second post, Germany noted that the Canadian proposal is a very pragmatic approach to handle the available data.

DISCUSSION

6. Given the available monitoring data (Canada, 2008-2017 and 2017-2018) and India (2012-2019), Canada proposed the use of chili (non-bell) pepper as the representative commodity for okra. Two options are available to use chili (non-bell) pepper (chili pepper) as the representative commodity for okra as shown in Appendix I.

CONCLUSIONS

7. Based on monitoring data provided by Canada and India, chili pepper (non-bell pepper) is proposed as the representative commodity for okra based on the low exceedances for okra and the sufficient conservatism in MRLs derived using the OECD MRL calculator to be protective of actual residues in okra.

RECOMMENDATIONS

8. CCPR is invited to consider the proposed options to revise the representative commodity for okra as chili pepper (non-bell pepper), taking into account the conclusions and recommendations as well as comments submitted by Codex members and observers in reply to CL 2022/34-PR.

⁶ REP21/PR52 para. 179

APPENDIX I**(For comments)**

Option 1, Add a comment or footnote to Subgroup 12B in the Classification as follows:

Group 12B, Pepper and pepper-like commodities	Sweet Pepper and Chili pepper	<u>Peppers (VO 0051)</u> : Martynia; Okra (only data from Chili pepper can be used to set a CXL); Peppers, Chili; Peppers, sweet; Roselle
---	-------------------------------	--

¹ Alternative representative commodities may be selected based on documented regional/country differences in dietary consumption and/or areas of production.

² Only data from chili pepper can be used to set a CXL.

Option 2, Move okra to a separate subgroup in the Classification as follows:

Codex Group/Subgroup	Examples of Representative Commodities	Extrapolation to the following commodities
Group 012 Fruiting vegetables, other than Cucurbits	One cultivar of large variety Tomato and one cultivar of small variety Tomato and Sweet Pepper and Chili pepper and One cultivar of large variety eggplant and/or tomato and one cultivar of small variety eggplant and/or tomato	<u>Fruiting vegetables, other than Cucurbits (VO 0050)</u> : African eggplant; Bush tomato; Cherry tomato; Cocona; Currant tomato; Eggplant; Garden huckleberry; Goji berry; Ground cherries, Martynia; Okra; Pea eggplant; Pepino; Peppers, Chili; Peppers, sweet; Roselle; Scarlet eggplant; Sunberry; Tomatillo; Tomato; Thai eggplant
Group 12A, Tomatoes	One cultivar of large variety Tomato and one cultivar of small variety Tomato	<u>Tomatoes (VO 2045)</u> : Bush tomato; Cherry tomato; Cocona; Currant tomato; Garden huckleberry; Goji berry; Ground cherries; Sunberry; Tomatillo; Tomato
Group 12B, Pepper and pepper-like commodities	Sweet Pepper and Chili pepper	<u>Peppers (VO 0051)</u> : Martynia; Okra ; Peppers, Chili; Peppers, sweet; Roselle
Group 12C, Eggplant and eggplant-like commodities	One cultivar of large variety eggplant and/or tomato and one cultivar of small variety eggplant and/or tomato	<u>Eggplants (VO 2046)</u> : African eggplant; Eggplant; Pea eggplant; Pepino; Scarlet eggplant; Thai eggplant
Group 12D, Okra	Chili pepper	<u>Okra (VO 0442)</u> : Okra

APPENDIX III¹
LIST OF PARTICIPANTS
(The List applies to all working documents
for Agenda Item 7)

Country	Name
USA	<i>Bill Barney (Chair)</i>
Netherlands	<i>Dorin Poelmans (Co-Chair)</i>
Argentina	Codex Argentina
Australia	Scott Mersch
Australia	James Oliver Deller
Australia	Ian Reichstein
Canada	Jennifer Selwyn
Colombia	Doris E. Novoa Bautista
European Union	Roberto Manos
Germany	Karsten Hohgardt
Germany	Alexandra de Athayde
Germany	Codex Germany
India	Krishna Kumar Sharma
India	Sunil Bakshi
Iran	Roya Noorbakhsh
Japan	Codex Japan
Japan	Yoshiyuki Takagishi
Kazakhstan	Gauhar Amirova
Kazakhstan	Zhanar Tolysbayeva
Kenya	Lucy Namu
Kenya	George Kiminza
Mexico	Tania Daniela Fosado Soriano
Republic of Korea	Kyung Hee
South Africa	Aluwani Alice Madzivhandila
United Kingdom	Julian Cudmore
United States of America	Marie Maratos
Croplife	Wibke Meyer
FEFAC	Arnaud Bouxin
ICBA	Simone SooHoo
IUPAC	Caroline Harris

¹ Please contact the focal point of the Member Country or Observer Organization for the details of the delegates. The list of Codex contact points for members and observers are available from the Codex website at: <http://www.fao.org/fao-who-codexalimentarius/about-codex/members/en/> <http://www.fao.org/fao-who-codexalimentarius/about-codex/observers/observers/obs-list/en/>
