In case that the CCFH54 complete the work on STEC and water, we think that it is appropriate to take on all proposals for new work which are the revision of Guidelines on the Application of the General Principles of Food Hygiene to the Control of Viruses in Food (CXG 79-2012), the revision of Guidelines for the Control of *Campylobacter* and *Salmonella* in Chicken Meat (CXG 78-2011) and the revision of Guidelines on the Application of General Principles of Food Hygiene to the Control of *Listeria monocytogenes* in Foods (CXG 61-2007).

For the revision of the Code of Practice on Food Allergen Management for Food Business Operators (CXC 80- 2020), we are of the opinion that the revision should take place when the CCFL finish the remaining work related to food allergens and propose for adoption at Step 8.
