Comments of Peru and United States of America

PERU

APÉNDICE IV

Los pequeños pelágicos como los engraulidos son muy aparentes para la producción de salsa de pescado. En Perú la talla mínima es 12 cm, y es bastante difícil de manipular eficientemente para ser eviscerado. Este Comité considera que el tamaño mínimo para proceder a la evisceración debe ser a partir de 15 cm.

APPENDIX IV

1. Small pelagic fish like engraulides are very apparent for fish sauce production. The minimum size is 12 cm in Peru, and it is very difficult to handle efficiently in order to be gutted. It is proposed that the minimum size to proceed to evisceration be considered from 15 cm.
