

### Upcoming HLPF themes and CFS products

These tables aim to provide an overview of how CFS products<sup>1</sup> are addressing the SDGs under in-depth review each year, at the overall Goal level. Where even one target is met, the box is shaded to indicate that the product is contributing to the achievement of the related Goal. Darker shading is used to identify *core focus*, or where the majority of targets under the goal are being addressed by the product. Lighter shading is used to indicate where the Goal may be addressed but by only a few references within the CFS product or where the minority of targets within the Goal are met by the CFS product. Grey shading is used for SDGs which are at the core of CFS’ mandate and as such as are addressed by all CFS products.
