

References to possible relevant International guidance and Technical Documents informing CFS policy convergence process

This document presents references to existing relevant international guidance as well as to technical documents concerning food systems and nutrition as a tool in support of the preparation of the Voluntary Guidelines. This is a living document, to be updated regularly based on the relevant inputs provided by the OEWG members, which will be made available in the CFS Nutrition working space.

The first section includes agreed policy guidance generated through intergovernmental discussions held in the context of the United Nations and endorsed by its Members.

The second section makes reference to technical reports, briefs and papers, generated in the context of the UN as well as by other relevant actors, which are not the result of the consensus among member states but can still provide useful inputs for the CFS policy convergence process.

The document will receive inputs from Members States; UN Agencies and CFS stakeholders.

A – Endorsed Policy Guidance
