

### **Germany comments on the outline of the 2024- 2027 MYPoW**

In general, thank you for the updated outline for the MYPoW 2024-2027 (doc. BurAG/2023/04/20/01) and the hard work done, it is very much appreciated.

Moreover, we are happy to support the suggested proposal to cluster “Food security crisis - Conflicts and the fragility of food systems” (original proposals #3 and #12 [by Germany]) as well as to cluster “Addressing emerging and re-emerging infectious diseases affecting food security and nutrition” (original proposals #10 and #14 [by Germany]).

On the suggestion regarding the proposal #36 (In-depth debate on enhanced efforts to increase global awareness and use of CFS Policy Products), we emphasize – as stated before – that this proposal is to be considered as a separate workstream set up as a usual CFS policy convergence process. While now being in the hands of Members, the proposal #36 recommends accordingly to have for example a report at the outset, to nominate a Rapporteur, to set up several OEWG meetings (asking external experts to join), to prepare an outcome document reflecting the inclusive discussions including hands-on recommendations for implementation and uptake. Given the very strong support for proposal #36 expressed by Members and Advisory Group Members for proposal #36 as a stand-alone item at the last CFS Bureau meeting on 20th April, we would like to echo this request here.

Finally, our priorities for the MYPoW 2024-2027, as indicated before, are in general the areas resilience, right to food, biodiversity and climate and the uptake of CFS policy products.

Many thanks again for the opportunity to provide comments on the proposals.
