

Feedback from IFAD on MYPoW first draft

IFAD would like to share the following feedback with regards to the workstream 1.4 *Strengthening responsible investment and financing for food security and nutrition*:

- IFAD is pleased that our comments have been included in the first draft under this workstream. It is important to ensure that duplication is avoided and that we leverage on the convening power of the CFS to ensure that all the right stakeholders who are working on the financing food systems transformation agenda are engaged actively in this workstream.
- IFAD also appreciates the inclusion of the proposal to have IFAD, World Bank and others working on this agenda periodically present to the CFS around progress and to provide updates around the area of financing food systems transformation particularly in the follow up to the FSS.
