

Switzerland - Comments on HLPF contribution 2024 – Zero Draft

In general: The submission is too long with 16 pages. 2020 = 6 pages, 2021 = 2 pages, 2022 = 9 pages, 2023 = 12 pages.

The contribution is focused on "zero hunger" (e.g. bullet 1 and 4 refer exclusively to hunger). However, SDG2 also includes malnutrition (sub-indicators 2.2.1., 2.2.2, 2.2.3). This should be better reflected.

The aspect of mitigation is not mentioned anywhere. The word "mitigation" appears twice in the climate policy recommendations. Shouldn't at least one of the two mitigation paragraphs be included (even if it only concerns research)?

Further observation: In Chapter 2, the title refers to "multiple crises". This is followed almost exclusively by paragraphs from CFS products that refer to (armed) conflicts. Shouldn't references be made to the biodiversity or climate crisis?
