

## **Russia's comments on the Zero Draft of the policy recommendations on Reducing Inequalities for Food Security and Nutrition**

Based on our previous comments to the draft we would like to propose a concrete para to be included in the subsection "Institutions and partnerships" of the draft:

*"Promote the improvement of the global food and agriculture governance system, focusing on increasing the representation, voice and decision-making power of developing countries".*

We have discussed this proposal with the delegations of Belarus, Cuba, Nicaragua and Venezuela. We have received their support for this idea so this para could be considered as a proposal from the group of countries.
