Impact assessment for forests
in Pakistan
Clim Res 12: 195–203, 1999
colour by pakistangeographic.com

- Forest area : 40224 million hac , 4.8 of the total land cover

- Most forest resources of Pakistan are concentrated in the mountainous regions of the north covering Himalaya, Hindukush and Karakoram ranges, where more than 60% of the country natural forest resources are found.

- The rest of forestry resource is distributed among the south-western mountains of Baluchistan, plains of Punjab and Sindh and the coastal areas of Arabian Sea in the south.

- KPK housed 40 percent forest
