The need

The programme on research and training on sustainable management of mountain areas (IPROMO) was launched in 2006 to face the request of several Mountain Partnership members, who identified.

the lack of mountain related capacity development programmes as a concrete obstacle to the sustainable development of mountains around the world.

IPROMO 2017, Monte Rosa

The idea

The **idea** promoted by FAO-Mountain Partnership was to periodically organize a full-immersion course on topics concerning the sustainable mountain development.

Beneficiaries: technicians, planners, decision-makers from mountain regions of the World

Subjects: activities in the fields of natural sciences, forestry, and socio-economics.

The designers

FAO - Mountain Partnership and University of Torino-DISAFA-NatRisk shared their ideas on mountain education and in **2007** signed a MOU with the aim to support the IPROMO Course.

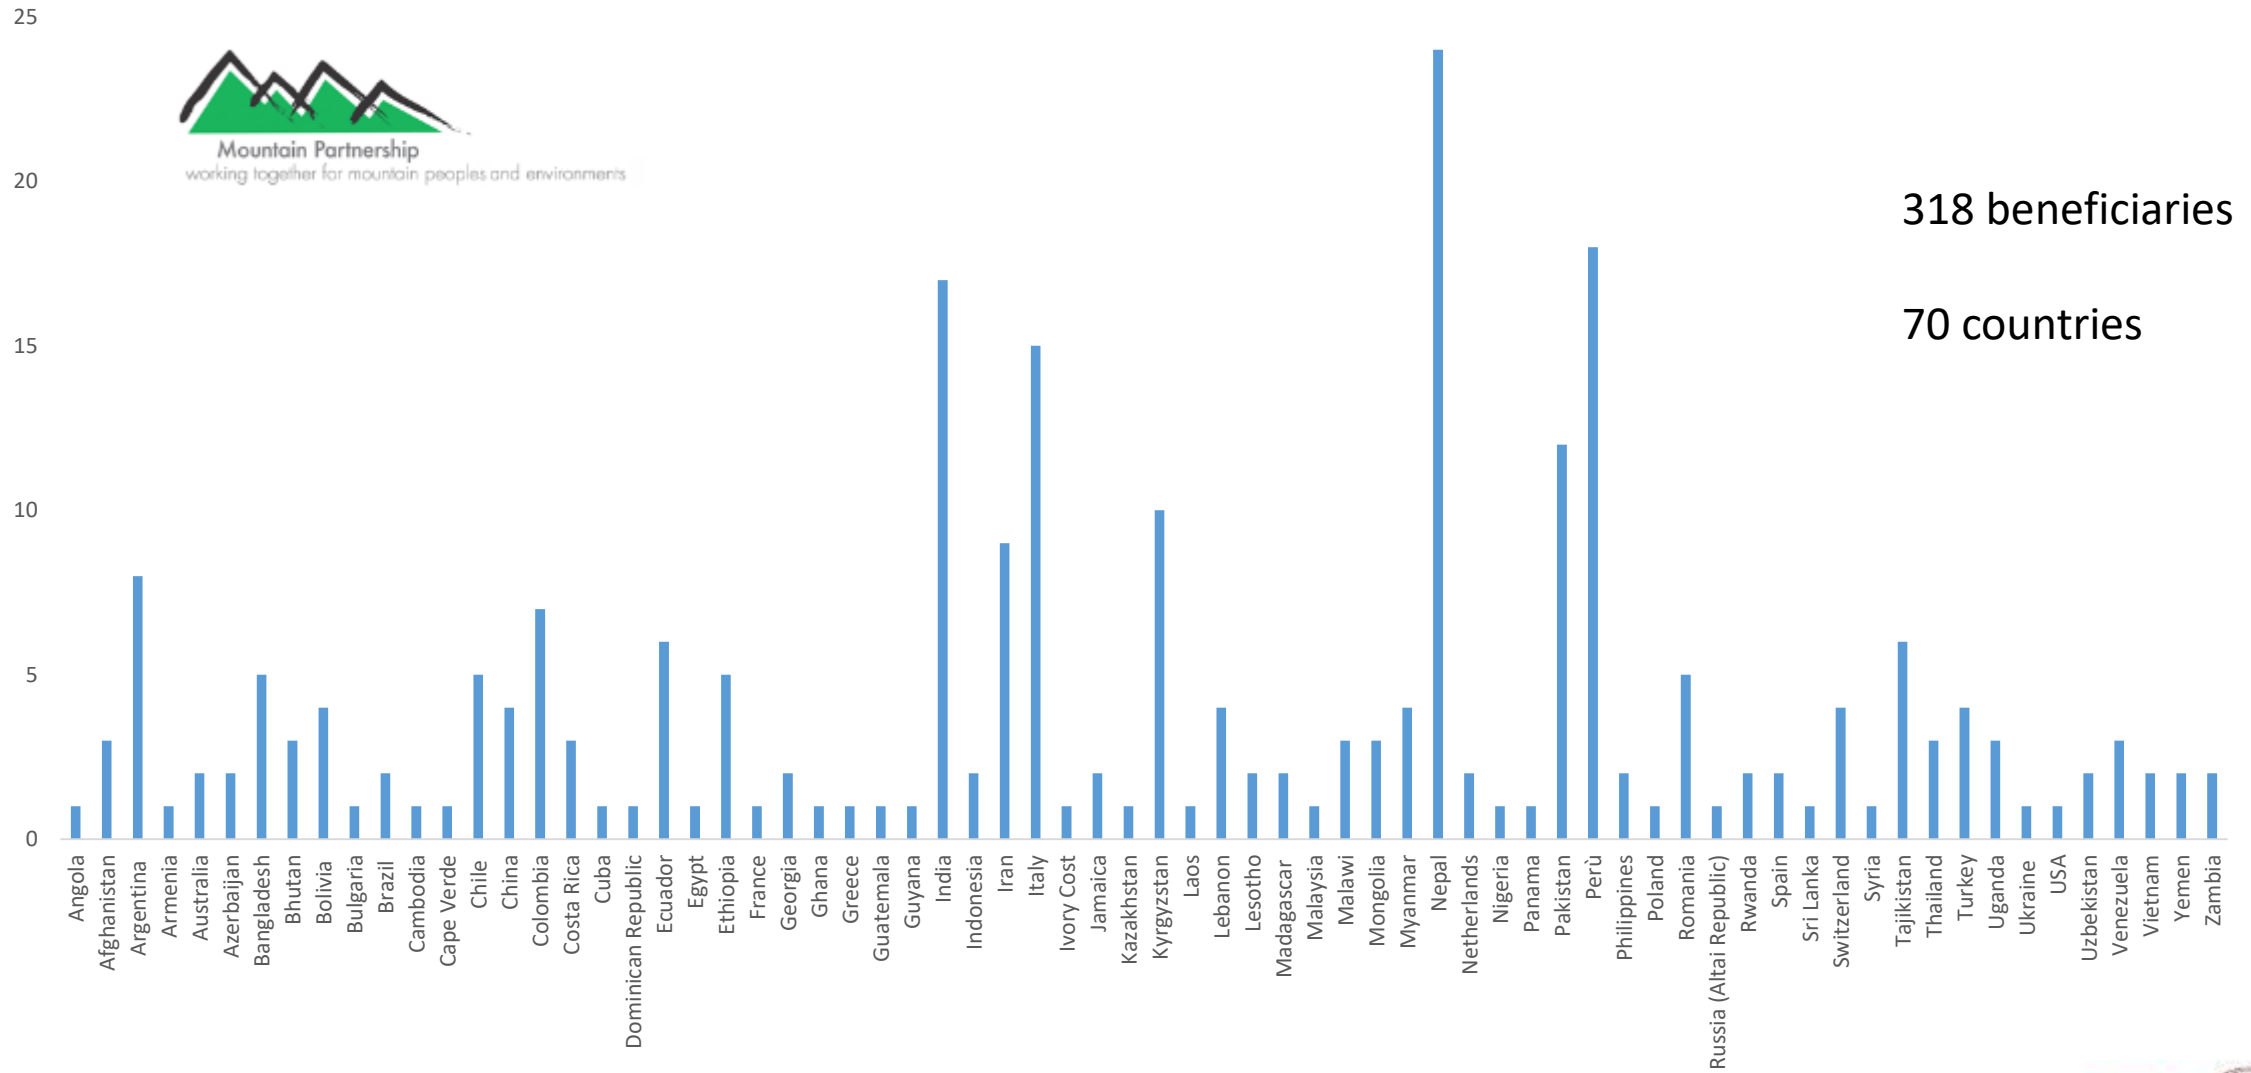

Venues: small villages in the Italian Alps (Ormea, Gressoney La Trinité, Alagna Valsesia)

Structure: 2 weeks of intensive course. Individual and working groups coordinated by a chairman.

IPROMO 2019, Forte di Bard

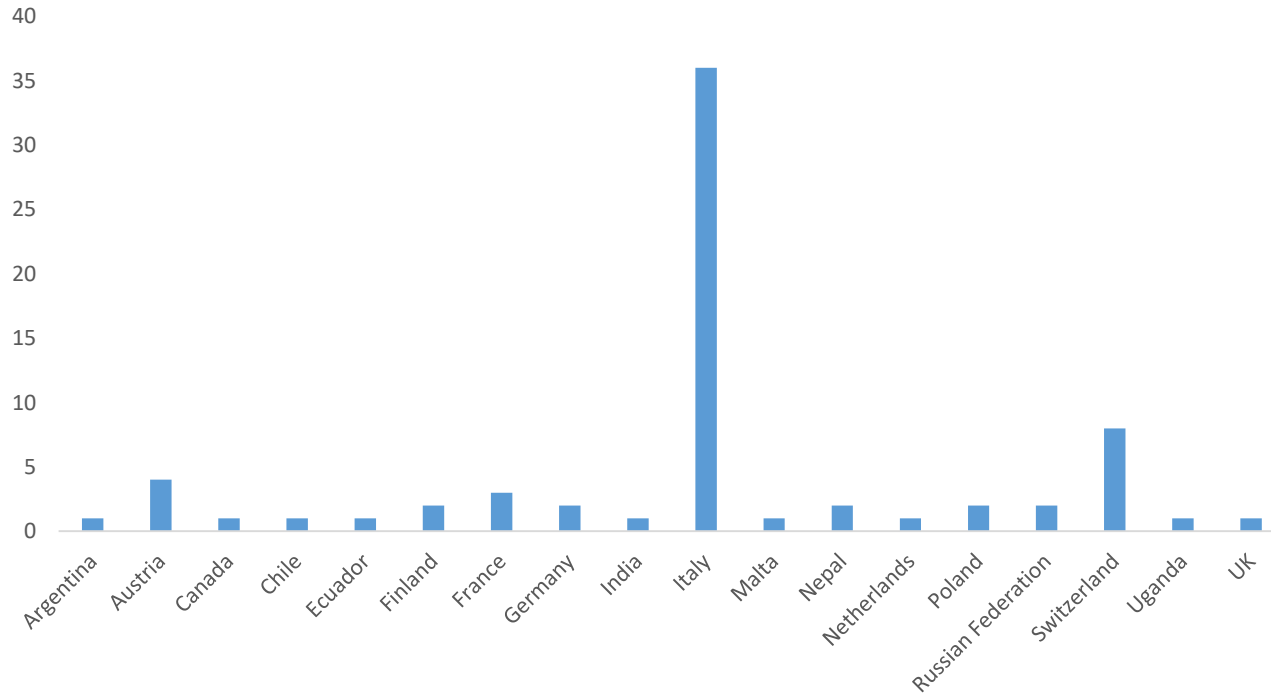

The beneficiaries

The teaching staff

93 instructors

16 countries

Welcome to the IPROMO Community

More than 80% of the participants are still in contact with the other participants

An ever-expanding virtual network of IPROMO alumni...
