2nd Meeting of the Near East and North African Laboratory Network (NENALAB)

28 October 2021

Item 2 *NENALAB updates*

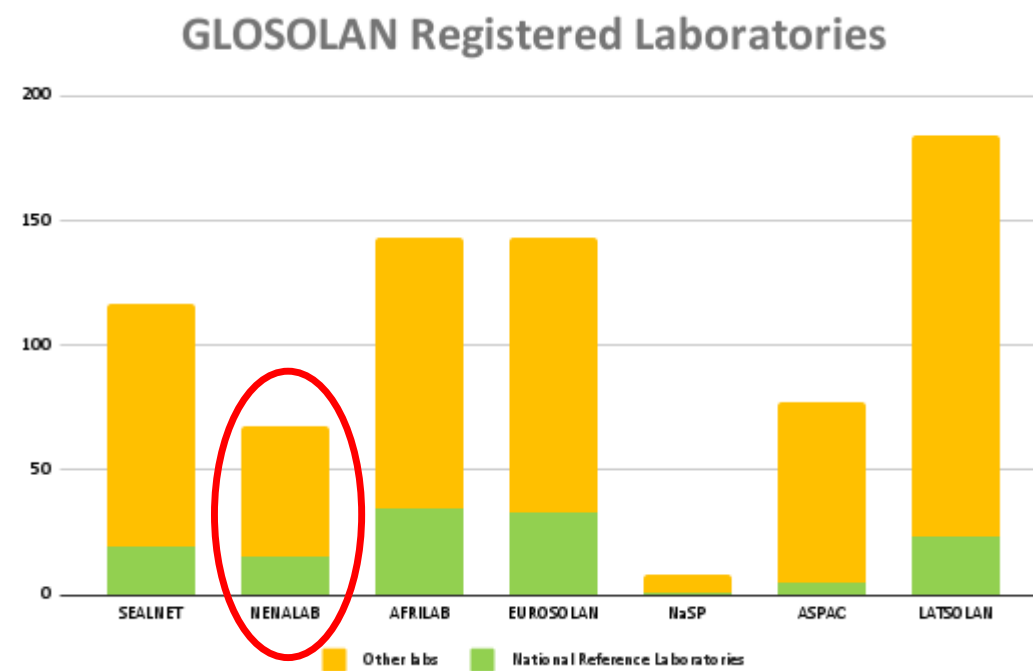

Mr. Filippo Benedetti, GSP Secretariat

NENALAB
NEAR EAST AND NORTH AFRICAN SOIL LABORATORY NETWORK

Global trend

2nd Meeting of the Near East and North African Laboratory Network (NENALAB) | 28 October 2021

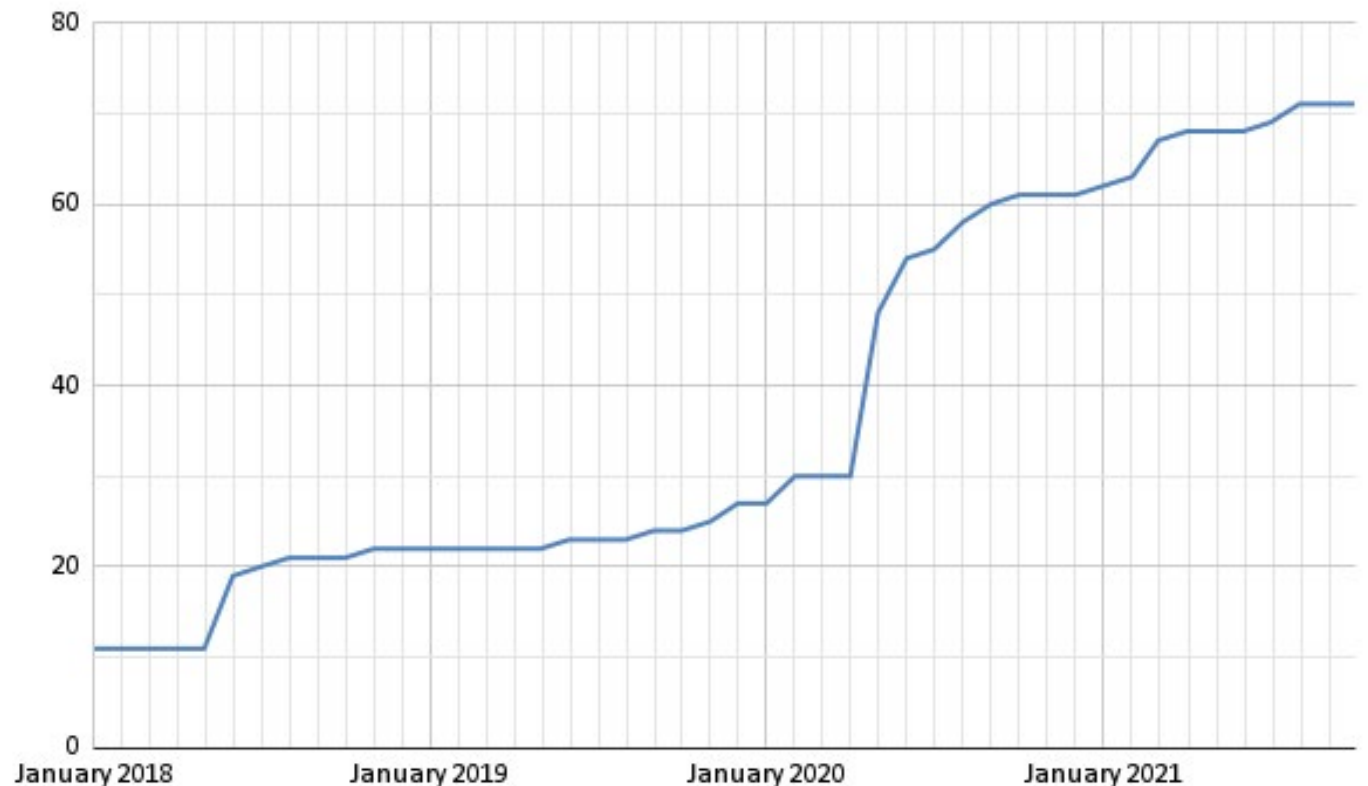

Regional trend

Since last NENALAB meeting:
+ 13 registered labs

Algeria, Egypt, Iran, Jordan,
Morocco, Saudi Arabia, Syria

- **Missing countries**
(no laboratory registered):
 - Libya
 - Qatar
- **Countries with no National Reference Laboratory nominated:**
 - Kuwait
 - United Arab Emirates

2nd Meeting of the Near East and North Africa

Scaling down: National networks

Why NASOLANs are needed?

- Improve the efficacy and outcomes of GLOSOLAN activities
- Develop ad-hoc programs to better face global and local challenges
- Reach a larger number of laboratories

Global

Regional

National

NASOLAN tasks

- Enlarge the network by **motivating** other soil laboratories operating in the country to register in GLOSOLAN and, consequently, in NASOLANs
- **Facilitate** the implementation of GLOSOLAN activities
- **Advertise** GLOSOLAN activities and events (e.g. online or in person training and meetings like those of the Regional Soil Laboratory Network), motivating national laboratories to take part in it
- **Organize** national trainings and **meetings** in order to:
 - Transfer the knowledge and skills acquired in GLOSOLAN/RESOLANs to other laboratories
 - Discuss common challenges and need
 - Explore financial resources mobilization opportunities
- Organize national inter-laboratory comparison exercises (**PT**)
- Keep the **communication** active with the Chair and Vice-Chair of their RESOLAN, the GSP national focal point and the GLOSOLAN coordinator
- Keep the **NASOLAN webpage updated** in order to facilitate:
 - i. The financial resource mobilization activities
 - ii. The involvement of laboratories in projects
 - iii. The monitoring of national activities.

We are here to support you!

2nd Meeting of the **Near East and North African Laboratory Network (NENALAB)** | 28 October 2021

National Soil Laboratory Networks

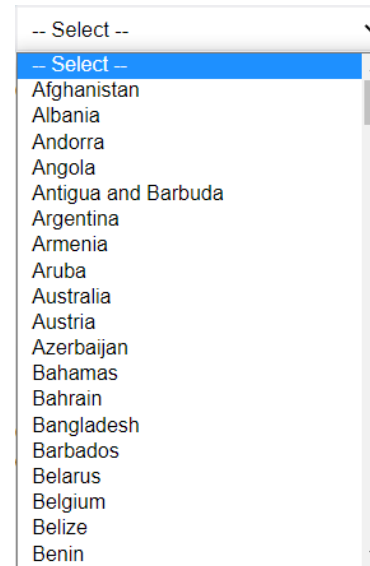

The success and impact of the Global Soil Laboratory Network (GLOSOLAN) strongly relies on the work and commitment of its member laboratories and on their ability to up and downscale GLOSOLAN activities and harmonized protocols. Regional Soil Laboratory Networks (RESOLANs) facilitate downscaling at the regional level. However, only the establishment of National Soil Laboratory Networks (NASOLANs) able to break down language and cultural barriers can make a difference at the country level.

Each NASOLAN represents the lowest network level of GLOSOLAN. They allow all soil laboratories in a country to interact with each other, overcome common challenges and help each other to build their capacity in soil analysis. Their tasks are described in **NASOLAN's Terms of Reference** (AR|EN|ES|FR|RU).

It is the responsibility of each National Reference Laboratory (see **Terms of Reference** (AR|EN|ES|FR|RU)) to lead the establishment of their NASOLAN and to coordinate the implementation of GLOSOLAN activities at the country level. To assist the National Reference Laboratories in this task, GLOSOLAN has prepared **Guidelines on how to establish a National Soil Laboratory Network** including case studies, and has created a NASOLAN webpage for each country.

Each webpage contains the following information:

- Status of the establishment of the network. Established/under establishment/not established
- Name of the network and number of members in the network
- Brief history of the network with a focus on the steps taken by the laboratories to establish it, the obstacles faced and potential supporters.
- Information on the activities implemented and meetings organized by the network. In this section, meetings material and outcome documents of the activities implemented by the NASOLAN will be published.

National networks in the regions

- **Not established yet** (different reasons/conditions) – We can help you
 - Low number of laboratories operating in the country
 - Communication problems
 - Lack of knowledge
 - Need of financial resources
- **Under establishment** – Any updates?
- **Established** - Any updates?

Please encourage all the laboratories in your national network to register in GLOSOLAN, so they can be informed on the global activities
