Facilitator training tool for FFS session quality control

→ Summary

The Farmer Field Schools (FFS) are platforms for discovery based learning for farmers. The FFS methodology was developed by Food and Agriculture Organization (FAO) of United Nations.

The Intensified Social Forestry Project in Semi-Arid Areas (ISFP), which is a technical cooperation project between JICA and Kenya Forestry Service (KFS), has been applying the FFS methodology in social forestry extension field since 2004.

Based on experiences of ISFP, this multi-media material “Facilitator training tool for FFS session quality control” is made to explain how FFS facilitators should perform in FFS sessions.

→ Target

Persons related to JICA's environment conservation project
