

Incorporating Indigenous Knowledge (IK) into Adaptation and Mitigation Strategies

- Identify and build on IK currently used for Mitigation and adaptation
- Improve knowledge base of local communities and other local stakeholders
- Minimize ambivalence in Adaptation strategies
- Build indigenous R & D capacity for adaptation technologies

Policy Directions for Adaptation in Africa

- Strengthen Africa's capacity to deal with climate change issues in an integrated approach.
- Investment in improved seeds adapted to African farming environments.
- Low-cost/appropriate technologies
- Mainstream climate change into development policies and plans.
