

Overview

Disaster Risk Management Working Group

FAO Expert Meeting on Climate Change and DRM
28-29 February 2008

Disaster Risk Management Framework

Source: Disaster Risk Management Cycle (DRMC) Diagram (TorqAid; <http://www.torqaid.com/default.asp>).

FAO DRM Working Group

from prevention to building back better

Interdisciplinary approach

- Range of expertise, technical and operational skills
- Sustainable Livelihoods Framework to DRM, DRR, mitigation and climate change adaptation

Objectives

- Source of information on technical, institutional and policy considerations
- Link technical and operational units – focus on lessons learned from the field
- Increase effectiveness in preparedness and response

FAO and DRM Working Group

from prevention to building back better

Developing guidance and toolkits

- DRM Systems Analysis, LAT and RADAR
- Good Practice - Climate Change Adaptation (FAO and UNFCCC)
- Seed Assessment and Livestock Emergency Guidelines

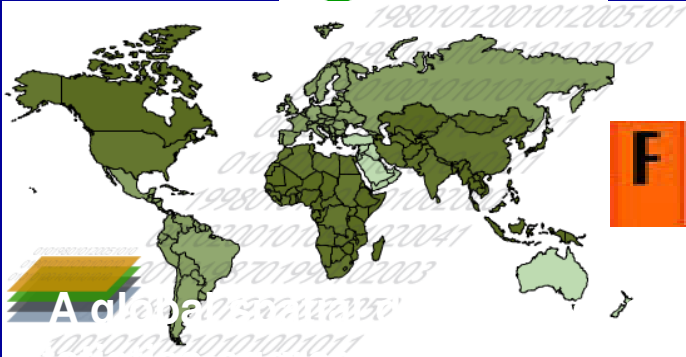

Project formulation and delivery

- Capacity-building - CC adaptation in Bangladesh
- Hazard Risk Preparedness in Agriculture: Good Practice South and South East Asia
- Local agricultural emergency preparedness in Caribbean countries highly prone to hurricane related disasters
- Lessons Learned – Nutrition in Emergencies
- DRR projects in Belize, China, Moldova, Nepal

www.fao.org/emergencies

information systems, databases, hazard specific warning mechanisms, impact assessment tools

Agro-MAPS

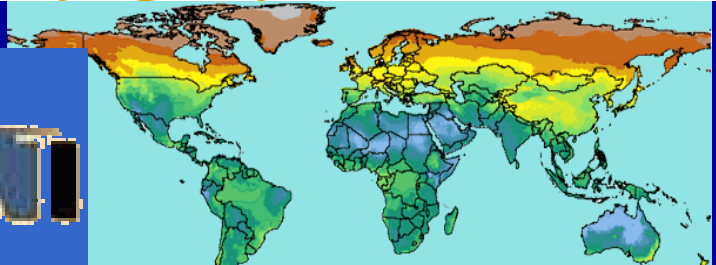

Initiatives to promote information and mapping systems on food insecurity and vulnerability

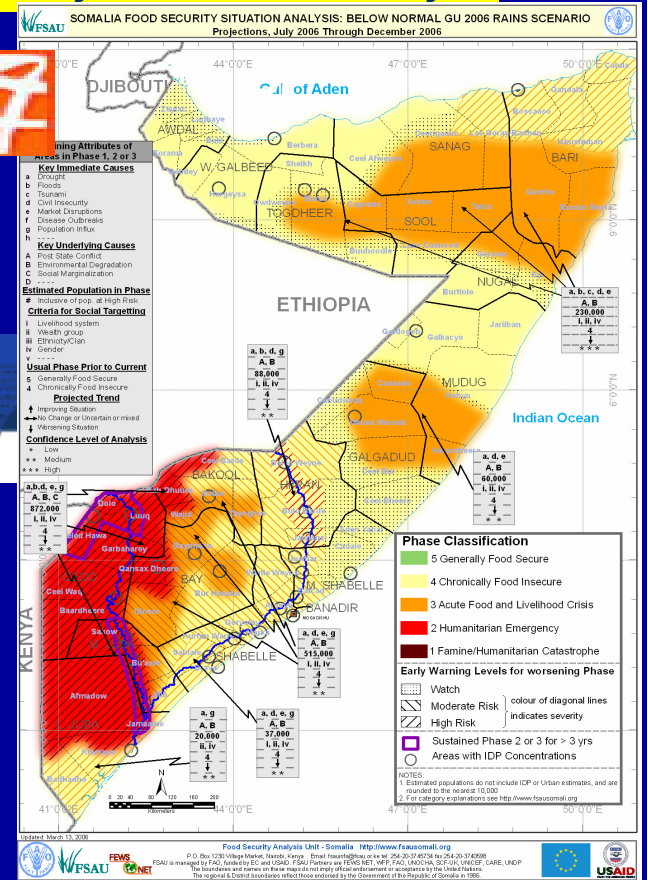

F I V I M S

agricultural land-use statistics aggregated by sub-national administrative districts

FAO // GeoNetwork
Find and analyze geo-spatial data

Global Agro-Ecological Zones (Global - AEZ)
CD-ROM FAO/IIASA, 2000
