Mountain Facts

Members in Mountains

- During COVID-19 -

Pradeep, CHINAR India

"There is definite fear among the people in the mountains about COVID-19, but mountains are safe as there is minimal movement of people from outside to the mountain areas. As the country has been lockdown for a month there are less chances of the virus reaching the interior mountain areas. "I think another advantage that mountains have is less population density so there is by default social distancing among different families which is a big advantage for the mountains to combat COVID-19.

Call for Action

Targeted investments

Sustainable production and diversification of food systems

Strengthening skills and value chains

Mountain related policies

MEMBERS

Currently, the Mountain Partnership has

CALL FOR NEWS

Keep Mountain Partnership members

394 members:
