

Poverty and food insecurity

are still high
among

Small family
farmers

in Zambia

Agriculture and Social protection together

can support

agricultural transformation

and reduce rural poverty

among small family farmers

in Zambia

Smallholder agricultural interventions

improve

access to

- natural resources
- technologies and
- markets

and

increase employment opportunities

for small family farmers

Social Protection

strengthens their capacities to **manage risks**

provides liquidity
for poor family farmers

and

allowing them to

engage in **productive activities**

FAO and its partners

generate

evidence on the impacts

of coordinated

agricultural

and

social protection

interventions

and

provide policy
support

Food and Agriculture Organization
of the United Nations
