

The main objectives of the land reform in the Republic of Uzbekistan:

Reforms in the transfer of agricultural land to land users

The procedure for registering the lease of agricultural land (up to 49 years) is fully digitalized through the “E-AUKSION” platform

Completely excluded the impact of the human factor and the possibility of corruption in the provision of land for rent

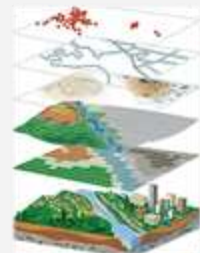

Increased state control over the expediency of using agricultural land

Reforms in the field of improving the multi-purpose land information system

The goal of the project is the formation of a multi-purpose database of the republic

- ✓ A unified geoportal has been created to provide accounting, monitoring and operational analysis of changes in agricultural land

Land information system interface (geoportal view)

Information about land users of agricultural land

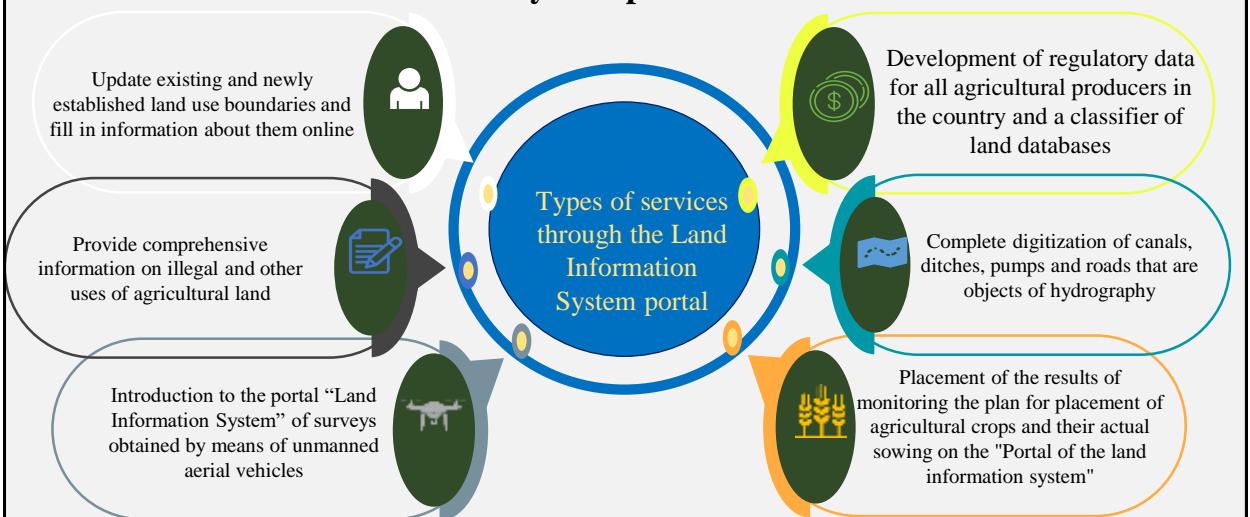

Borders and contour numbers of agricultural land

Land information system interface (geoportal view)

Types of services through the Land Information System portal

Foxtech HOVER 1

Drone for monitoring
DJI Phantom 4 pro+

Drone for Monitoring and
Surveillance DJI MINI 2

Spray drone
THEA 130 S

Drone software
Ardu Pilot

Prospects of the Republic of Uzbekistan for 2022 and coming years

1. Improvement of the land market
2. Full digitalization of land registration
3. Improvement of land management projects
4. Active implementation of the "green economy" system in the agricultural sector
5. Strengthening control over the rational and efficient use of natural resources
6. Completion of the development of a multi-purpose database of agricultural land
7. Strengthening the role of women in agricultural production
8. Development of a new methodology for assessing land
9. Implementation of new advanced technologies, equipment and software in land relations
10. Participation in the creation of layers of global mapping of the world
11. Cooperation with international organizations
