Introduction

The 10th LANDNET workshop will take place from 19 to 21 June 2018 in Skopje in FYR Macedonia. The workshop is at the same time a Regional Consultation Workshop for the FAO regional study on land consolidation legislation with focus on identifying regional best practice and developing generic guidance on the drafting of land consolidation legislation. The planned study was briefly introduced at the LANDNET workshop in Budapest in October 2017. The workshop will present preliminary results on the land consolidation study of joint WPLA/FAO/TUM research project.

The workshop will be organized jointly between FAO and the UNECE Working Party on Land Administration (WPLA) and is part of a wider cooperation on land consolidation between WPLA, FAO and other partners including the Dutch Kadaster and the Technical University of Munich.

The objectives of the workshop are to:

- *Present and validate the outcome of the FAO regional study on land consolidation legislation*
- *Present ongoing support to an operational national land consolidation programme in FYR Macedonia*
- *Present and discuss topics of mutual interest of LANDNET and WPLA*
- *Present and discuss gender principles and issues in land governance in Western Balkans*
- *Discuss progress on the ongoing development of LANDNET*

The final version of the workshop programme will be available before the workshop.

We are looking forward to welcome all LANDNET partners, WPLA associates and others in Skopje!
