of the United Nations**

Workshop on Forest Management and Climate Change in Eastern Africa

Objectives and Expected Outcomes

**14-16 December 2016
Dar Es Salaam, Tanzania**

Food and Agriculture Organization of the United Nations – *for a world without hunger*

**Food and Agriculture Organization
of the United Nations**

Objectives

Overall objective:

- **to assess current forest management practices, climate change challenges and opportunities and identify priority areas for adjustment to incorporate climate change considerations using the climate change guidelines for forest managers.**

Also provide an opportunity to articulate specific goals and objectives for climate change which can assist forest managers in incorporating climate change considerations into forest management plans and practices.

Food and Agriculture Organization of the United Nations – *for a world without hunger*

**Food and Agriculture Organization
of the United Nations**

Outputs

- **Experiences shared, and challenges and opportunities assessed; for forest-related climate change mitigation and adaptation in the sub-region;**
- **Initiatives and priorities identified for forest managers to better able to respond effectively to climate change;**
- **An operational approach for integrating climate change consistently into forest management practices provided;**
- **Needs and gaps identified, for individual and institutional capacity to implement climate change adaptation and mitigation actions;**
- **An action plan for the implementation of the guidelines discussed and drafted.**

Food and Agriculture Organization of the United Nations
